QuestBrand

Brand measurement

CUSTOMER PERSONA

Arman
VP of Consumer
Insights

Role profile

- **Decision Makers:** VP of Consumer Insights, Director of Research, VP of Brand/Marketing
- **Teams who use Product:** [Brand teams](#), [ad/marketing/influencer/B2B agencies](#), [marketing teams](#), [insights teams](#)
- **User of Product:** VP of Consumer Insights, Director of Research, Director of Insights, Brand Manager, VP of Brand

Org profile

- **Target:** High growth brands that need always-on brand tracking
- **Industries:** Quick Service Restaurant (QSR), Retail & Ecommerce, Consumer Packaged Goods (CPG)
- **Stage/Size (i.e. startup, growth, enterprise):** Growth-stage through Enterprise brands with active brand and media investment.
- **Location/Regions:** Over 20 global markets

Use cases

Key challenges

- **Fragmented brand visibility**
- **Delayed campaign validation**
- **Competitive blind spots**
- **Hidden trends and signals**
- **Emotional uncertainty**
- **Reporting friction**

Buying triggers

- **Brand performance is scattered** across audiences, markets, and channels
- **Campaign impact remains unclear** until after critical decisions are made
- **Teams struggle to identify meaningful shifts** across markets and categories
- **Early signals remain buried** within changing audience behaviors
- **Messaging misses the feelings** influencing purchase and brand usage
- **Needing customizable, flexible tracking** to meet unique audience and brand needs

QuestDIY

DIY research

CUSTOMER PERSONA

Michelle
Director of Research

Role profile

- **Decision Makers:** VP of Consumer Insights, Director of Research, Insights Manager
- **User of products:** VP of Consumer Insights, Director of Research, Director of Insights, Insights Manager

Org profile

- **Target:** Brands needing fast, self-service consumer research to validate concepts, messaging, campaigns, and product ideas.
- **Industries:** Consumer Products, Travel & Hospitality, Financial Services, Media, Advertising, PR, Brand agencies
- **Size:**
- **Location/Regions:** Access to respondents in 100+ countries (multilingual support)
- **Stage (i.e. startup, growth, enterprise):** Mid-market to enterprise brands and agencies with ongoing consumer research needs and a desire to scale insights without adding headcount.

Use cases

Build AI-powered surveys

Cost-effective
global insights

Sample advanced quotas

Test campaign participation

DIY insights team extension

Define best practices

Key challenges

- **Slow survey design**
- **Limited respondent access**
- **Sample control gaps**
- **Inconsistent research standards**
- **Limited research bandwidth**
- **Weak creative feedback**

Buying triggers

- **Need confidence before launch** when testing creative, messaging, or concepts prior to market release
- **Difficulty running research across multiple markets** and need respondents in different countries and languages
- **Facing fast decision timelines** requiring research insights in hours, not weeks
- **Concerned about sample quality** and need more control over balanced, representative audiences
- **Establishing research guardrails** to ensure studies align with internal standards and best practices
- **Operating with limited team bandwidth** and need support with survey design, deployment, and reporting

BERA.ai

CUSTOMER PERSONA

Christine
CMO

Role profile

- **Decision Makers:** Chief Marketing Officer (CMO), Vice President of Brand, Chief Financial Officer (CFO), or Managing Director (Agency)
- **User of products:** Brand Managers, Marketing Analytics Directors, Consumer Insights Managers, Media Planners, and Corporate Finance Analysts

Org profile

- **Target:** Enterprise brands bleeding margin to generic competitors who need to prove their brand equity/ drive financial market value
- **Industries:** CPG & Food/Beverage, Retail & Ecommerce, Automotive, Financial Services, Telecommunications
- **Location/Regions:** Global
- **Stage (i.e. startup, growth, enterprise):** Mid-market to enterprise organizations

Use cases

Key challenges

- **Explaining "The Why" Behind Brand Shifts**
- **Eliminating Brand Blind Spots**
- **Activating High ROI Audiences**
- **Measuring the Economic Impact of Brand and Prove Its Financial Value**

Buying triggers

- **Brand ROI uncertainty** - Struggling to prove how brand investments drive revenue and growth
- **Unexplained brand shifts** - Brand metrics change, but the reasons remain unclear
- **Siloed marketing data** - Brand, media, and business data live in separate systems
- **Audience prioritization challenges** - Unclear which audiences will deliver the highest ROI
- **Competitive blind spots** - Limited visibility into competitor performance and movement
- **Slow insight delivery** - Critical brand insights take too long to uncover
- **Inconsistent market visibility** - Difficult to compare brand performance across markets

The Machine

The Machine - ICP

The Machine is for enterprise marketing teams looking to connect their existing tools, audiences, insights, campaigns, and production workflows into one agentic operating system that continuously learns and optimizes

CUSTOMER PERSONA

Alec
Chief Marketing
Officer

Role profile

- **Decision Makers:** CMO, CCO, CDO, CTro; CMO -- Chief Digital Officer, or Head of MarTech with POC sign-off authority; the economic buyer (CFO/COO) enters at conversion.
- **User of Products:** Marketers, Creatives, Analysts, Martech Transformation Lead, Marketing Ops, CTO, CIO, IT Security

Org profile

- **Target:** The Machine is for enterprises looking to activate their existing stack, connect workflows across teams, and bring together intelligence (The Knowledge Machine), audience targeting (The Targeting Machine), and campaign orchestration (The Media Machine) through one agentic operating system
- **Industries:** CPG, Retail, Financial Services, Technology and SaaS, Media and Entertainment, Telecom, and Healthcare and Pharma
- **Stage (i.e. startup, growth, enterprise):** Enterprise organizations (\$1B+ revenue), multi-brand enterprises, global marketing organizations, and integrated agency teams with dedicated marketing operations or martech functions
- **Location/Regions:** North America (primary), EMEA (secondary)

Use cases

Workflow Orchestration

Team Alignment

Strategic Intelligence

Audience Targeting

Campaign Orchestration

Agent: Continuous Learning

Key challenges

- **Teams repeatedly recreate work** instead of building on prior intelligence
- **Coordination costs rise** while creation quality remains inconsistent
- **Decisions are misaligned** due to disconnected knowledge and context
- **Performance gains are lost** because learning doesn't carry forward

Buying triggers

- Marketing operations have become increasingly fragmented
- Campaign complexity outgrew existing workflows
- Teams struggles to work from shared knowledge and resources
- Existing tools fail to share context and learning; need to connect them somehow
- Need to scale output without adding headcount
- Seeking greater value from technology investments

The Media Machine

The Media Machine - ICP

The Media Machine is for enterprise media teams looking to connect their existing paid media & measurement ecosystem under a governed, fully agentic operating system that spans media strategy, planning, activation, optimization and measurement utilizing a consistent, interconnected, intelligent infrastructure that supports a cycle of continuous learning-to-action in paid media design and deployment.

CUSTOMER PERSONA

Priya
Chief Media Officer /
Head of Media / CMO

Role profile

- **Decision Makers:** Chief Media Officer, Head of Media. TMM also opens up a new conversation with the CMO. The economic buyer (Procurement) enters throughout the decision-making process mainly as a result of the tie to media investment.
- **User of Products:** Client-side media teams – all levels of experience and expertise within Media and Marketing. Also used by our own teams in managed service of our clients: Strategists, Media Planners, Media Buyers/Traders, Campaign Managers, Trafficking & Operations teams, Measurement & Analytics teams.

Org profile

- **Target:** Enterprise advertisers running paid media across multiple platforms and/or channels, with active always-on or campaign-based media investment
- **Industries:** CPG, Retail, Financial Services, Technology & SaaS, Media & Entertainment, Telecom, Healthcare & Pharma
- **Stage (i.e. startup, growth, enterprise):** Enterprise organizations with active multi-platform and/or multi-channel media investment
- **Location/Regions:** North America (primary), expanding to EMEA and APAC

Campaign Orchestration

Agentic Media Workflow

Media Optimization

MMM & Incrementality

Media Investment

Audience Targeting

Media Planning & Activation

Cross-Platform Activation

Key challenges

- **A fragmented media ecosystem**, platforms hold their own audiences, signals and results — no single source of truth across campaigns, channels, budgets and creative
- **By necessity Media has evolved as a production line of stages, each with its own tools and owners.** Value & fidelity leaks in the handoffs between them and stitching their insight together is imperfect, resource intensive work
- **Media Measurement & attribution** is often disconnected from where the core media activation workflow happens
- **AI has been introduced to almost every discrete element of the media workflow**, but it still doesn't connect the stages well enough to reach maximum value gains

Buying triggers

- An existing ad-tech & partner stack that the client doesn't want to abandon, but that needs better interconnectedness and faster insight to action
- Existing clients: Media activation and performance is scattered across platforms such as DV360, Meta, TikTok and Amazon (etc) with no trusted reconciled view. Both operational and growth challenge.
- New clients: Highly likely triggered by competitive strategic media agency review process (typically 2-3 year cycle). Same challenge/ triggers as existing clients but with added competitive dynamic

THE KNOWLEDGE MACHINE

The Knowledge Machine - ICP

The Knowledge Machine is for assessing signals, anticipating risks, and acting with confidence.

CUSTOMER PERSONA

Emre
Chief Comms Officer

Role profile

- **Decision Makers:** CCO, CMO, VP of Comms
- **User of Products:** Head of Comms, Director of Public Affairs, Director of External Comms, Corporate Comms director/lead, Brand Strategist

Org profile

- **Target:** Companies seeking deeper insight beyond traditional social listening to get ahead of reputational threats, not just react to them
- **Industries:** Pharma, Finance, Insurance, Energy, Government
- **Stage (i.e. startup, growth, enterprise):** Enterprise
- **Location/Regions:** North America and Europe

Use cases

Brand tracking

Competitive analysis

Brand equity

Campaign tracking

Corporate reputation

Audience segmentation

Conversion funnel

Key challenges

- **Lagging Indicators Arrive Too Late** – Traditional metrics miss emerging issues before they reach critical volume
- **Signal vs. Noise Uncertainty** – Uncertain which issues demand immediate action vs. Noise
- **Missing the "Why" Behind Issues** – Tools show what's happening, but lack deep emotional drivers
- **Reactive vs. Proactive Response** – Miss early signals and respond only once issues surface
- **Decision Paralysis Under Pressure** – Difficulty acting amid uncertainty and high-stakes pressure

Buying triggers

- **Reputation Threats** – CCO can't distinguish which trending alerts matter vs. noise, missing crises.
- **Missing Emotional Context** – Communications teams have dashboards but lack sentiment needed for confident decisions
- **No Early Warning Signals** – Crises surface suddenly, forcing reactive decision-making
- **Post-Crisis Visibility** – Issues surface too late for leaders to prevent reputational damage

The Targeting Machine

The Targeting Machine GTM – Ideal Customer Profile (ICP)

The Targeting Machine is for exploring, scaling and activating audiences and then measuring impact using the Stagwell ID Graph.

CUSTOMER PERSONA

Delphine
Chief Marketing
Officer

Role profile

- **Decision Makers:** Head of Insights, Chief Analytics Officer, CMO, Chief Growth Officer, Chief Data Officer
- **User of Products:** VP Consumer Insights, Performance Marketing Leads, Head of Measurement, VP Brand, VP Acquisition

Org profile

- **Target:** Brands with multi-channel ad spend and a need to merge 1P + 3P data for targeting audiences
- **Industries:** CPG, Retail, QSR, OOH/DOOH, Ecommerce, Omnichannel Ad Tech, Travel, Entertainment/Media, Event Venues, Insurance Ads
- **Size:** Mid-market to Enterprise (significant paid media budgets)
- **Location/Regions:** North America (US focus - Stagwell ID Graph coverage is US-centric)

Use cases

Audience exploration

Audience expansion

Segmentation

Capabilities

1P onboarding & ID mapping

Cross-channel activation

Site pixeling

Key challenges

- **Fragmented data silos** – First-party, third-party, and behavioral data disconnected across systems
- **Slow audience creation** – Niche and custom audiences are difficult to identify and time-consuming to build
- **Disconnected workflows** – No seamless path from audience discovery & insight to channel activation
- **Limited customer understanding** – Difficulty identifying high-value customers beyond standard demographics

Buying triggers

- **First-party data is underused** – limited lookalike modeling, retention, personalization, and cross-sell opportunities
- **Cannot identify niche audiences quickly** – hindering campaign and growth initiatives
- **Media performance or efficiency declines** - due to imprecise targeting and wasted spend
- **Audience insights are trapped in analysis** – prompting need for discovery, segmentation, lookalike creation, and targeting in one platform
- **Campaign activation is delayed or inconsistent** - siloed audience data and workflows cause friction

CUSTOMER PERSONA

Jackson
Chief Comms Officer

Role profile

- **Decision Makers:** CCO, VP of Corporate Communications, Head of Public Affairs, Global Comms Director
- **User of Products:** Media Analysts, PR Managers, Corporate Comms Teams, Public Affairs Officers, Brand Strategists

Org profile

- **Target:** Multinational corporations needing global agentic + human media intelligence: media monitoring, campaign measurement and more
- **Industries:** Pharma, Finance, Insurance, Tech, Energy, Automotive, Industrials, Government, Retail, Airlines, Sports
- **Stage/Size (i.e. startup, growth, enterprise):** Enterprise
- **Location/Regions:** Europe

Use cases

Global monitoring

Curated news briefings

Daily reviews & alerts

Media analysis

Social listening

GEO monitoring

Microsoft 365 Copilot integration

Key challenges

- **Limited media monitoring coverage** - Missing sources create competitive blind spots
- **Reactive, not predictive intelligence** - Emerging threats escalate before detection or response
- **Raw data without real-time analysis** - Volume lacks actionable insight or business impact
- **Disconnected insights from decision-making** - Analytics don't translate to strategy or response
- **Manual, fragmented data access** - Multiple tools delay integrated ecosystem and insights

Buying triggers

- **Media coverage gaps exist across sources** - limiting comprehensive monitoring, early detection, and competitive awareness in one platform
- **Reputation risks or threats are missed** - incomplete coverage / lack of predictive intelligence
- **Stakeholder awareness is reactive, not proactive** - limited alerts hinders timely response
- **Can't anticipate emerging trends quickly** - limiting crisis prevention and competitive positioning

IMAI (Enterprise) - ICP

IMAI is the full influencer & social intelligence platform: listen, understand, execute, and measure across LLM Visibility, Consumer Intelligence, and AI-powered creator & journalist discovery, vetting, and execution; unified in one dashboard.

CUSTOMER PERSONA

Regina
CMO
/ Head of
Influencer
Marketing

Role profile

- **Decision Makers:** CMO, VP of Marketing, Director (VP) of Influencer Marketing, Director of Social Media, Head of Brand Marketing, Agency Director, Agency Brand Manager
- **User of Products:** Influencer Marketing Manager, Social Media Manager, Creator Partnerships Manager, Campaign Manager, Content Strategists, Talent Managers

Org profile

- **Target:** Large organizations (brands or agencies) typically with decentralized marketing teams managing 100+ active creator relationships that need one platform to unify discovery, vetting, and ROI reporting.
- **Industries:** Agencies, E-commerce & D2C, Media & Entertainment, Fashion & Apparel, Beauty & Cosmetics, Health & Wellness, CPG, Food & Beverage, Travel, Entertainment, Gaming.
- **Locations: Global:** N. America, Europe, Middle East, LATAM, APAC
- **Stage (i.e. startup, growth, enterprise):** Growth, Mid-market, Enterprise, Global brands, Agencies, Orgs with Multi Brands/Multi Regions

Use cases

Key challenges

- **Vision: Turning Fragmented Influencer Intelligence Into Clarity** - Struggles unifying signals into clear opportunities and risks
- **Strategy: Turning Influencer Insights Into Investment Decisions** - Have the insights but don't know how to strategize for success
- **Planning: Turning Siloed Influencer Planning Into Coordinated Action** - Rely on manual processes to manage campaigns, budgets, and resources
- **Execution: Turning Creator Workflows Into Scalable Activation** - Lack a unified platform to manage creators, content, and campaigns
- **Measurement: Turning Performance Data Into Continuous Optimization** - Can't consistently measure and optimize performance
- **Fragmented tooling across brands/regions** - decentralized teams juggle spreadsheets and multiple platforms

Buying triggers

- **Difficulty identifying the right creator, influencer, and consumer trends** across fragmented social and market conversations
- **Challenges prioritizing influencer and creator investments** without data-backed campaign and audience insights
- **Inability to coordinate influencer campaigns across brands, markets, and teams** due to disconnected planning workflows
- **Limited visibility into influencer budget and resource allocation** across campaign performance and outcomes
- **Difficulty activating creator and influencer campaigns at scale** across contracts, content approvals, and performance tracking
- **Inability to identify highest-performing creators, campaigns, and markets** from fragmented global performance data

Stagwell AI for SMBs

(in light of not having an official name)

Stagwell AI for SMBs- ICP

Stagwell AI for SMBs is the influencer & social intelligence platform — listen, understand, execute, and measure, all from one dashboard.

CUSTOMER PERSONA

Jonathan
Marketing
Manager/Head of
Marketing

Role profile

- **Decision Makers:** Marketing Manager, Head of Marketing, Founder/Owner (smaller teams), Head of Social, Brand Manager.
- **User of Products:** Influencer Marketing Manager, Social Media Manager, Creator Partnerships Manager, Campaign Manager

Org profile

- **Target:** Brands and small agencies that need an efficient way to discover creators, validate audience quality, and prove ROI without a big team or budget.
- **Industries:** Agencies, E-commerce & D2C, Media & Entertainment, Fashion & Apparel, Beauty & Cosmetics, Health & Wellness, CPG, Food & Beverage, Travel, Entertainment, Gaming.
- **Location/Regions:** North America, Europe, APAC, LATAM, Global
- **Stage:** SMB brands and small/boutique agencies -- 10-250 employees, \$100K-\$1M annual marketing budgets, startups through small mid-market.

Use cases

Key challenges

- **Vision: Finding Right Creators Without Data** — Can't unify social signals to identify relevant creators and audience fit
- **Strategy: Guessing on Creator Investments** — No insights to prioritize which creators will drive results
- **Planning: Manual Campaign Coordination** — Managing creator outreach, contracts, and budgets via spreadsheets
- **Execution: Scattered Creator Management** — Juggling emails, approvals, and content with multiple creators across platforms
- **Measurement: Can't Track What Works** — No visibility into creator performance or campaign ROI
- **Limited time & headcount** — one or two people covering discovery through reporting.

Buying triggers

- **Workload grows, our team is small**, how do we keep track of influencers in one space?
- **Can't afford ineffective creator campaigns**, making it difficult to scale influencer investments with confidence.
- **Losing hours to creator, content, and campaign management across disconnected tools** reducing team efficiency
- Outgrowing spreadsheets/manual process, ready for their first dedicated platform (or replacing other small platform)

GEOPulse

CUSTOMER PERSONA

Layla

Head of Digital Marketing /
VP Marketing

Role profile

Decision Makers: Head of Digital Marketing, Head of Insights & Analytics, Marketing Analytics VP, Strategy VP, Chief of Comms

User of Products: Consumer Insights Manager, Market Research Manager, Marketing Analytics Manager, Digital Marketing Manager

Org profile

- **Target:** Brands seeking visibility, citation authority, and reputation management across AI platforms such as ChatGPT, Gemini, Copilot, Perplexity, Grok, and Meta AI
- **Industries:** Pharmaceuticals (primary: Bayer example from deck), Finance, Retail, QSR & Restaurants, Financial Services, Healthcare & Pharma, Automotive, Commercial Real Estate, Travel & Hospitality, Media & Advertising
- **Stage:** Mid-market to Enterprise
- **Location/Regions:** Global, with coverage across multiple geographies and languages

Use cases

Prompt optimization

AI visibility intelligence

Competitive benchmarking

Visibility optimization

Content simulation

Key challenges

- **AI share of voice is invisible or only measured across limited LLMS** - Basic metrics miss true positioning and citation authority in LLM outputs
- **Prompt optimization is manual** - Teams manually manage prompts instead of continuously optimizing from AI feedback
- **Insights lack actionability** - Data surfaces issues but not prioritized, ROI-driven recommendations
- **No AI impact forecasting** - Dashboard content exists but doesn't help predict AI forecasting

Buying triggers

- **Lacking confidence in how your brand appears across AI platforms** when leadership asks about AI brand perception
- **Struggling to understand your competitive position in AI** - unclear if brand is being cited, recommended, or overlooked
- **Knowing there's an AI visibility problem but not where to start** high-impact opportunities are unknown
- **Lacking confidence in launching monetized content or messaging** without knowing whether it will improve AI visibility before budget is committed

Numetrix

CUSTOMER PERSONA

Fumi
Marketing Analyst

Role profile

- **Decision Makers:** Leaders across Insights and analytics, sales and research, marketing, brand
- **Titles:** Director/VP/SVP of: Insights and Analytics, Data and Analytics, Audience Insights, Data Strategy, Consumer Insights, Research, Measurement and Attribution

Org profile

- DOOH networks and companies with video networks/screens interested in measuring audience; ad campaign performance; looking to sell ad inventory and need to be comparable to other media types
- No employee size restriction; must have budget (~\$100K+) for measurement.
- All growth phases
- USA

Use Cases

- Audience measurement
- Brand lift & ad impact
- Consumer experience (surveys)

Key challenges

- Little to no understanding of audience composition or how to quantify/apple value to the audience
- Cannot transact on impressions-based currency
- Audience data and inventory is not visible where media planners and buyers are
- Not understanding if campaigns are driving brand lift, consideration or purchase intent
- DOOH/DPB are not seen as provable and don't have the same measurement that TV, CTV, etc. are able to show, including lift

Buying triggers

- Need for audience measurement data for programmatic advertising
- Need for video-aligned audience data
- Need for verified exposure
- Increase value of audience/higher CPMs

CUSTOMER PERSONA

Kevin
Marketing Director

Role profile

- **Decision Makers:** Data and insights-related leadership, executives -level teams
- **Titles:** Data Acquisition Manager, Head of Data and Strategy, Head of Insights, Head of Investment, Head of Growth

Org profile

- AdTech, OOH/DOOH, Retail, Brand, CRE, REIT, Market Research, FinTech, Consumer Analytics, Insurance, Emerging Tech, Urban Development
- No specific size; ideally budgets of ~\$120K ARR
- Start-up to Enterprise
- USA (for now)

Use Cases

- Location intelligence
- Consumer insights
- Visualization of movement

Key challenges

- Ingesting large data feeds/files
- Budgetary restrictions
- Timeline and overlap issues
- Entering new markets
- Education on value
- Need for raw data feeds & premium data points
- Ad exposure
- Ad effectiveness

Buying triggers

- Need to enrich first-party data
- Need to understand consumer behavior (visitation patterns, brand affinities and loyalty, competitive intelligence, etc.)
- Need to create audience segments to target consumers based on lifestyle and visitation habits

AgentCloud

Agent Cloud– Ideal Customer Profile (ICP)

Agent Cloud is for organizations looking to centralize access to leading AI models, deploy reusable agents, and standardize AI workflows

CUSTOMER PERSONA

Delphine
CMO (or IT Lead)

Role profile

- **Decision Makers:** C-Suite, Head of Marketing, Head of Marketing Technology, IT Lead --- Heads of Strategy, Marketing Operations, Communications, PR
- **User of Products:** Marketing managers and teams, Social Media teams, communicators

Org profile

- **Target:** Marketing teams with limited bandwidth; organizations struggling with fragmented AI tools and inconsistent adoption that need centralized AI access, reusable agents, and governance to improve the speed, consistency, and scale of work
- **Industries:** Brands, tier 2 and tier 3 agencies (not part of holding company) and in-house marketing teams across any industry
- **Size:** Small to medium-size businesses
- **Location/Regions:** North America and Europe, with growing global usage across distributed teams and regions

Use cases

- AI Optimization, Agents & Governance
- Knowledge sharing
- Usage Analytics
- Workflow Automation
- Enterprise Adoption

Key challenges

- **Governance: Turning AI Risk Into Secure Adoption** - Inconsistent AI usage creates security and IP risks
- **Standardization: Turning Prompts Into Shared Intelligence** - Lacks shared prompts, agents, and best practices
- **Visibility: Turning AI Usage Into Actionable Insights** - Limited visibility into adoption, usage, and costs
- **Efficiency: Turning Manual Work Into Automation** - Repetitive tasks slow productivity and execution
- **Scale: Turning AI Success Into Organizational Impact** - Struggles to scale effective AI practices across teams
- **Optimization: Turning AI Investments Into Measurable Value** - Difficult to measure AI impact and ROI

Buying triggers

- **Leadership mandate to operationalize AI** but team lacks secure, centralized platform with governance controls
- **AI subscription costs exploding** across departments; CFO demanding consolidation and accountability on spend
- **Security audit flagged public AI tools** as IP and compliance risk; need enterprise solution urgently
- **Client demanding faster turnaround** on work; team needs AI agents to scale output without adding headcount
- **Scaling AI beyond one successful pilot** to multiple departments; need reusable agents and workflows
- **Team wasting hours on repetitive tasks** (research, audits, proposals) that should be automated with shared AI agents

BERA.AI

The Knowledge Machine

The Knowledge Machine – GTM Industry Playbook

PHARMACEUTICAL

Pharma / Life sciences

WHO YOU'RE SELLING TO

Chief Marketing Officer Chief Communications Officer
Medical Affairs Director Director of Public Affairs

Quantify why doctors and patients switch between your drug and rival treatments

HOW THEY USE THE KNOWLEDGE MACHINE

1. ASSESS

Understand why doctors and patients prefer competing treatments

2. ANTICIPATE

Detect early signals of prescription and treatment switching

3. ACT

Shape perceptions before switching behavior impacts market share

WHY NOW Undetected Sentiment + Delayed Action = Prescription Churn

FINANCE

Financial services / Banking

WHO YOU'RE SELLING TO

Chief Financial Officer Chief Communications Officer
Chief Risks Officer Investor Relations Director

"Early warning system for reputation threats tied to market volatility"

HOW THEY USE THE KNOWLEDGE MACHINE

1. ASSESS

Emerging investor anxiety before equity impact

2. ANTICIPATE

Policy debates gaining traction

3. ACT

On concerns before media coverage

WHY NOW Market events + analyst chatter = investor flight risk

INSURANCE

Insurance / Risk management

WHO YOU'RE SELLING TO

Chief Risk Officer Chief Claims Officer
VP of Customer Relations Director of Public Affairs

"Real-time visibility into emerging claims pattern and customer churn before they impact profitability"

HOW THEY USE THE KNOWLEDGE MACHINE

1. ASSESS

Fraud indicators and claim submission anomalies across the portfolio

2. ANTICIPATE

Policy lapse signals and coverage denial pushback gaining momentum

3. ACT

With proactive retention messaging claims and empathy outreach before cancellation

WHY NOW Rising fraud losses + policy cancellations = critical early intervention

GEOPulse

The Targeting Machine

Nine buyers. One platform. → Each with distinct interests in The Targeting Machine

VPs AND C-SUITE BUYER PERSONAS:

Buyer examples by top industry: Entertainment Retail CPG

MARKETING

Unifies audience strategy, activation, and measurement

Scales viewer engagement into cultural relevance

Drives store traffic using shopper behavior

Proves audience, content & media ROI through consumer insights

ACQUISITION / GROWTH / PERFORMANCE

Identifies and scales high-propensity audiences

Subscribers, viewers & ticket buyers

High-value shoppers & loyalty prospects

High-propensity category & brand buyers

MEDIA STRATEGY

Activates precise audiences across supported media channels

Fans across digital, event ticketing & CTV channels

Shoppers across supported media channels

Consumers across supported media channels

CONSUMER INSIGHTS / MARKET RESEARCH

Enriches customer understanding with behavioral and interest signals

Content preference analysis & fandom drivers

Purchase behaviors & category affinities

Brand affinity & purchase occasions

LOYALTY CRM

Enriches first-party audiences for targeting and growth

Helps transform subscribers/viewers/fans into loyal customers

Customer, loyalty & transaction audiences

Consumer & brand-engagement audiences

ANALYTICS / DATA

Creates governed, reusable audience intelligence

Quantifies audience sentiment for content optimization

Shares omnichannel shopper behavior and turns it into actionable insights

Validates consumer, retail & media behavior with consumer signals

PRODUCT / PRICING

Standardizes audience definitions across teams and use cases

Audiences across product content & platforms

Segments across channels & categories

Segments across brands & markets

BRAND STRATEGY

Turns consumer signals into actionable brand insights

Fandom signals → brand & content strategy

Shopper signals → brand/shopper strategy

Consumer signals → brand & portfolio strategy

AD SALES RESEARCH

Packages high-value audiences for differentiated media activation

Converts audience sentiment into sponsorship dollars

Turns shopper behavior into ad revenue

Translates CPG insights into revenue

The Targeting Machine GTM – Industry Playbook

ENTERTAINMENT

Film / TV / Streaming / Live Events

WHO YOU'RE SELLING TO

CMO Growth Marketing Director Head of Media
Chief Data Officer Paid Media Director

*Connect audience, content, and media signals to grow tune-in, subscriptions, engagement, and fandom.**

HOW THEY USE SATS

1. EXPLORE

Identify high-propensity audiences by genre, platform, viewing behavior and cultural interests

2. SCALE

Build lookalike audiences from subscribers, viewers, ticket, buyers, and engaged fans

3. ACTIVATE

Reach audiences across social, search, direct partners, and programmatic/CTV channels

4. MONITOR

Track campaign exposure, engagement, conversions, and subscription / ticket-sales impact*

5. OPTIMIZE

Shift spend to high-performing audiences, content, creative, and markets

WHY NOW Fragmented audiences + rising acquisition costs = missed growth and engagement

RETAIL

Apparel / Shoes / Etc.

WHO YOU'RE SELLING TO

CMO Marketing VP Ecommerce Director
Head of Customer Intelligence Category Manager

"Unify in-store, e-commerce, and behavioral data to grow foot traffic, basket value, and omnichannel loyalty"

HOW THEY USE SATS

1. EXPLORE

Segment customers by purchase frequency, basket size, category affinity signals*

2. SCALE

Build lookalike audiences from best customers for expansion across locations

3. ACTIVATE

Reach retail audiences across supported digital and media channels

4. MONITOR

Measure foot traffic lift, basket growth, and customer lifetime value uplift*

5. OPTIMIZE

Shift media and promotional spend to highest-performing categories and customer segments*

WHY NOW Foot traffic dying + churn invisible = margin erosion now

CPG

Food & drink / Household / Personal care

WHO YOU'RE SELLING TO

CMO/SVP Marketing Media & Performance Director
Brand Marketing Director Shopper Marketing Manager

*"Connect audience, brand, media, and retail signals to accelerate product velocity and improve promotional efficiency."**

HOW THEY USE SATS

1. EXPLORE

Identify high-propensity consumers by purchase occasion and brand affinity

2. SCALE

Build lookalike audiences across partner databases and underperforming markets*

3. ACTIVATE

Deploy targeted media and digital promotions to untapped consumers, with in-store activation*

4. MONITOR

Track shelf velocity lift, promotional ROI, and repeat purchase rates by market*

5. OPTIMIZE

Identify best-performing tactics and shift promotional spend to top opportunities*

WHY NOW Shelf velocity collapsing + spend scattered = promotional ROI broken

* Capabilities and outcomes depend on the availability, quality, permissions, and integration of client, retailer, media, mobility, inventory, activation, and measurement partner data.
