Visual Brand Guidelines

Brand Elements

Vertical Logo

- 1.1 Spacing
- 1.2 Clearance Area
- 1.3 Tagline & Minimum Size

Horizontal Logo

- 2.1 Spacing
- 2.2 Clearance Area
- 2.3 Tagline & Minimum Size

Improper Logo Use

Logo Size and Placement

Color Palette

- 4.1 Preferred Color Combo
- 4.2 Preferred Single Color

Typography

- 5.1 Montserrat Primary Typeface
- 5.2 Spectral Accent Typeface
- 5.3 Font Pairing Application

HORIZONTAL LOGO

The Stagwell logomark is the most important brand element as it represents pieces coming together to build something greater.

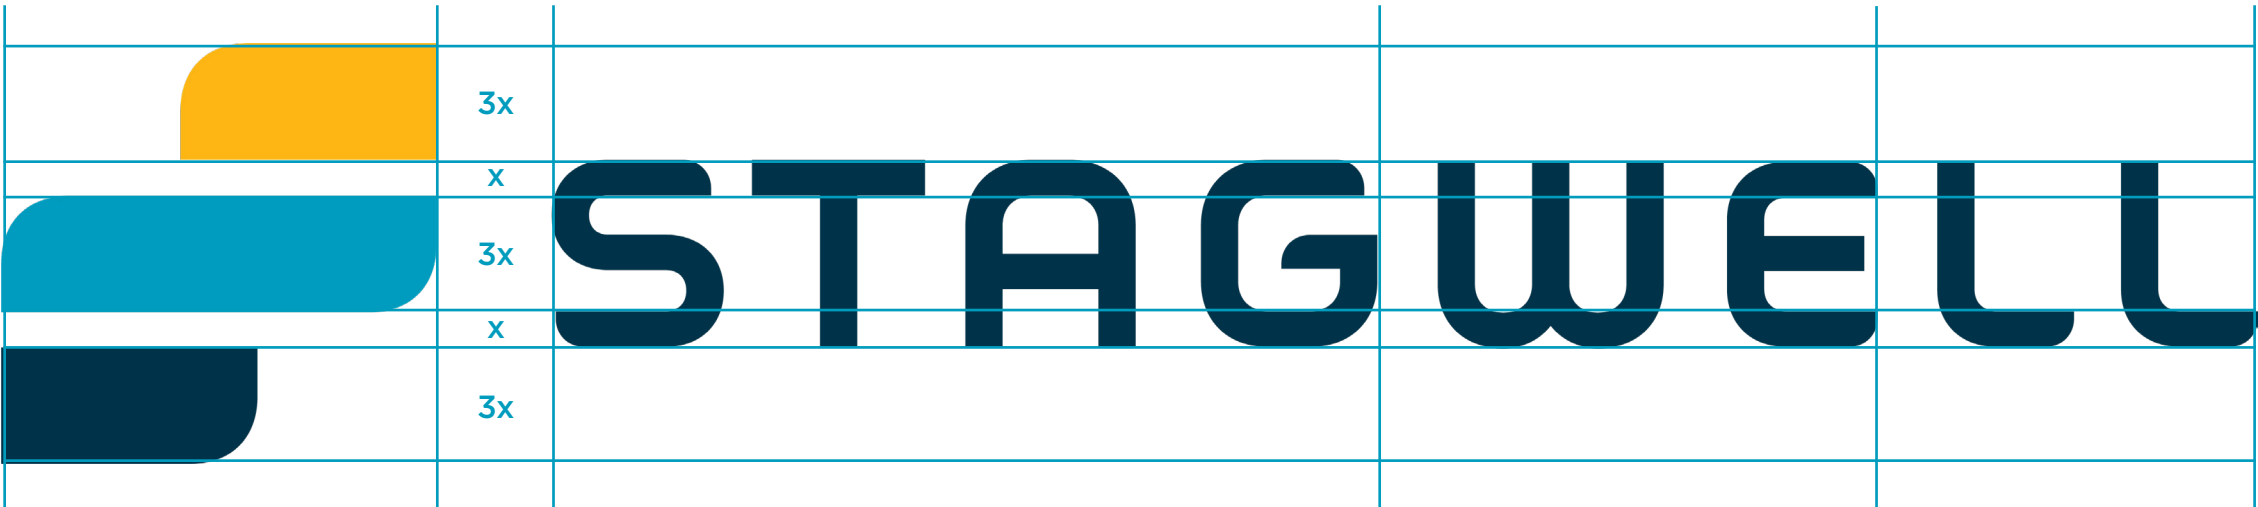

This logo should be used whenever possible in all communications, such as television, print, digital media, social channels, signage, promotional materials, etc.

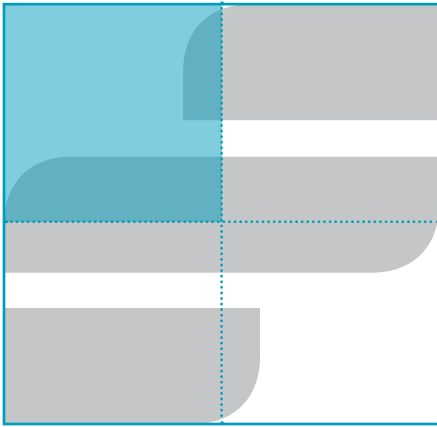

1.1 SPACING

This graph represents the correct way to find the logo symbol size and space from the wordmark.

To find the right size proportion between the wordmark and the symbol, start with the horizontal lockup orientation. The relation between the cap height of the wordmark to the height of the symbol should be 5x : 11x. The symbol should be centered vertically in relation to the wordmark. Once you find the correct size proportion and positioning using this method, space the symbol 3x to the left of the wordmark.

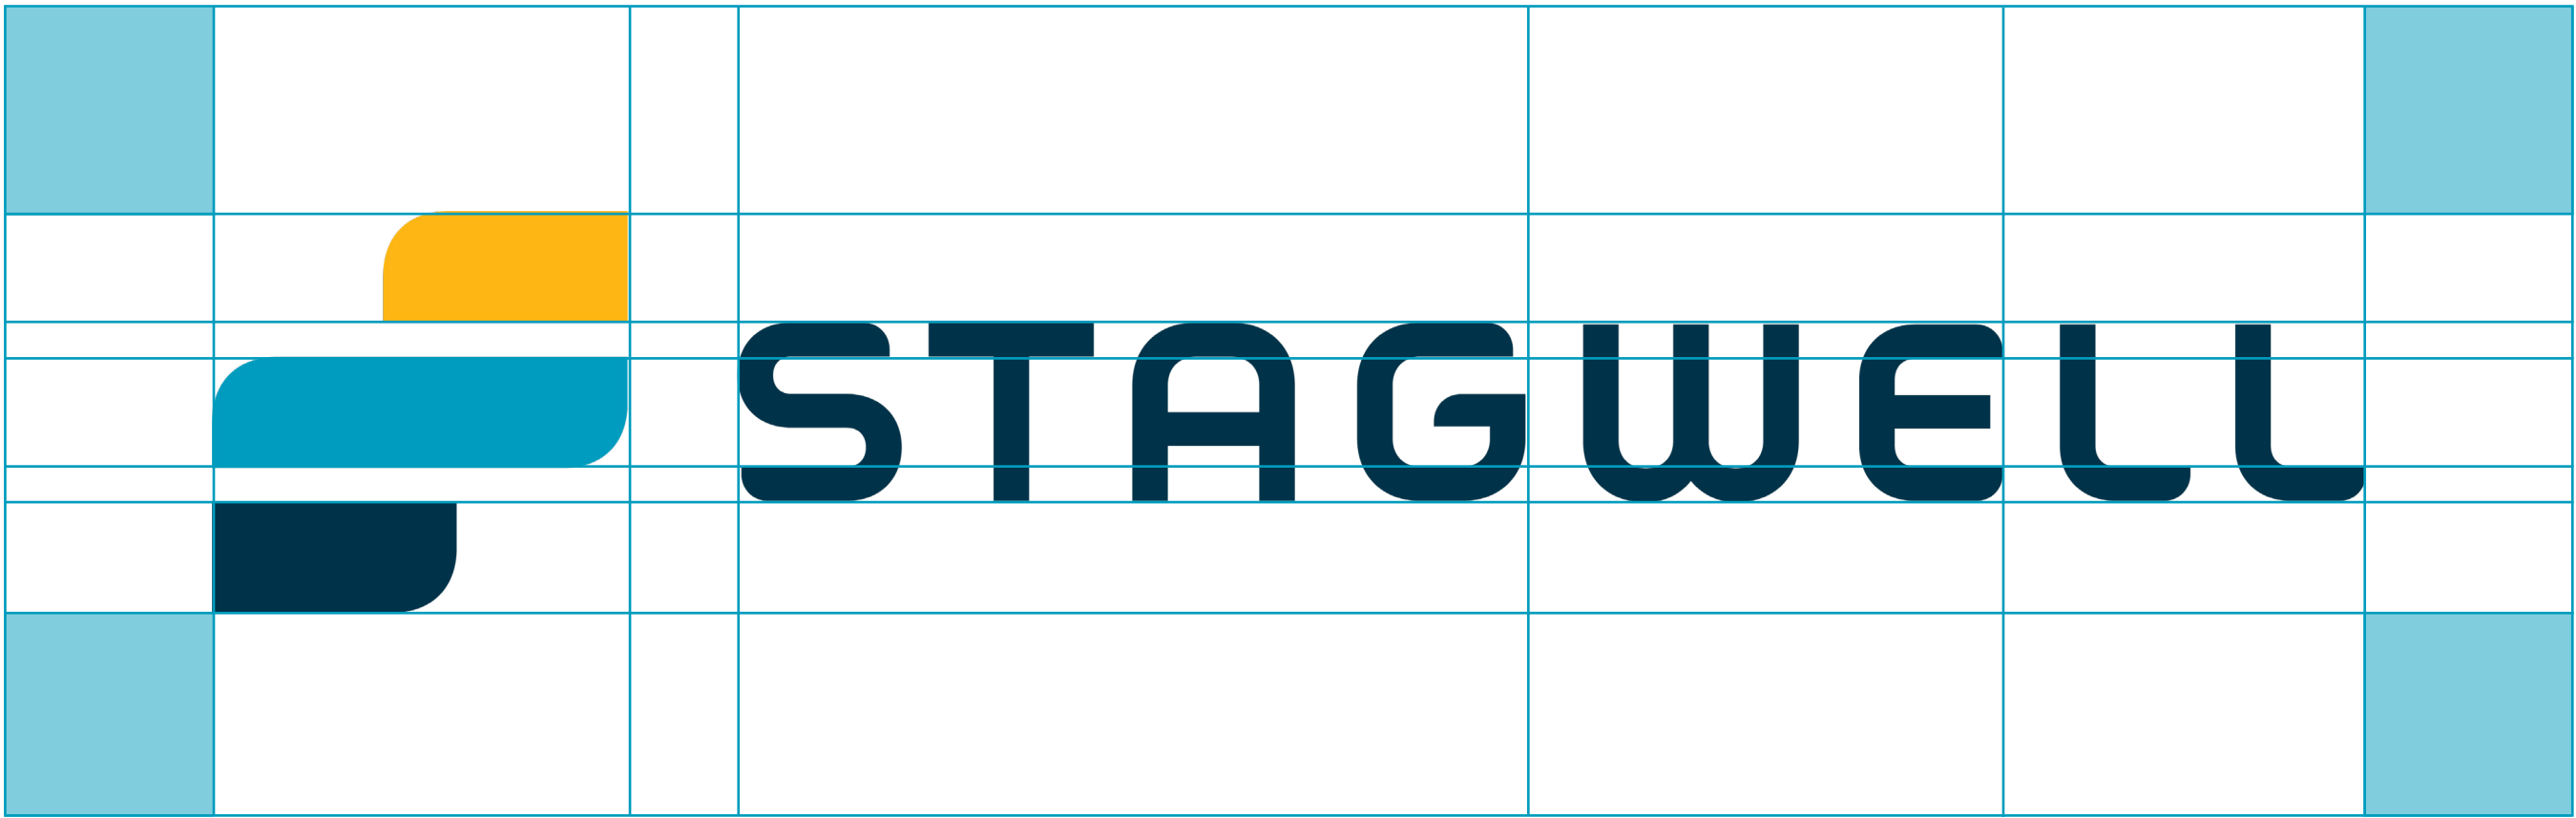

1.2 CLEARANCE AREA

Maintaining a consistent area of isolation around the logo preserves maximum legibility and brand impact. These margins should surround the logo and separate it from headlines and text.

Whenever possible, allow for a minimum padding around the logo lockup based on half of the height of the logo symbol around all sides.

1.3 TAGLINE & MINIMUM SIZE

The tagline should be left-aligned underneath the wordmark. It should spread to the width of the left side of the letter “S” and the right side of the letter “E” from the word STAGWELL. The baseline of the tagline should align with the bottom of the logo symbol.

The full Stagwell logo lockup with tagline should not be used at sizes less than 150 px for optimal legibility. When it is necessary to use the logo at a size smaller than 150 px, use without the tagline.

Minimum Size:

Below Minimum Size:

VERTICAL LOGO

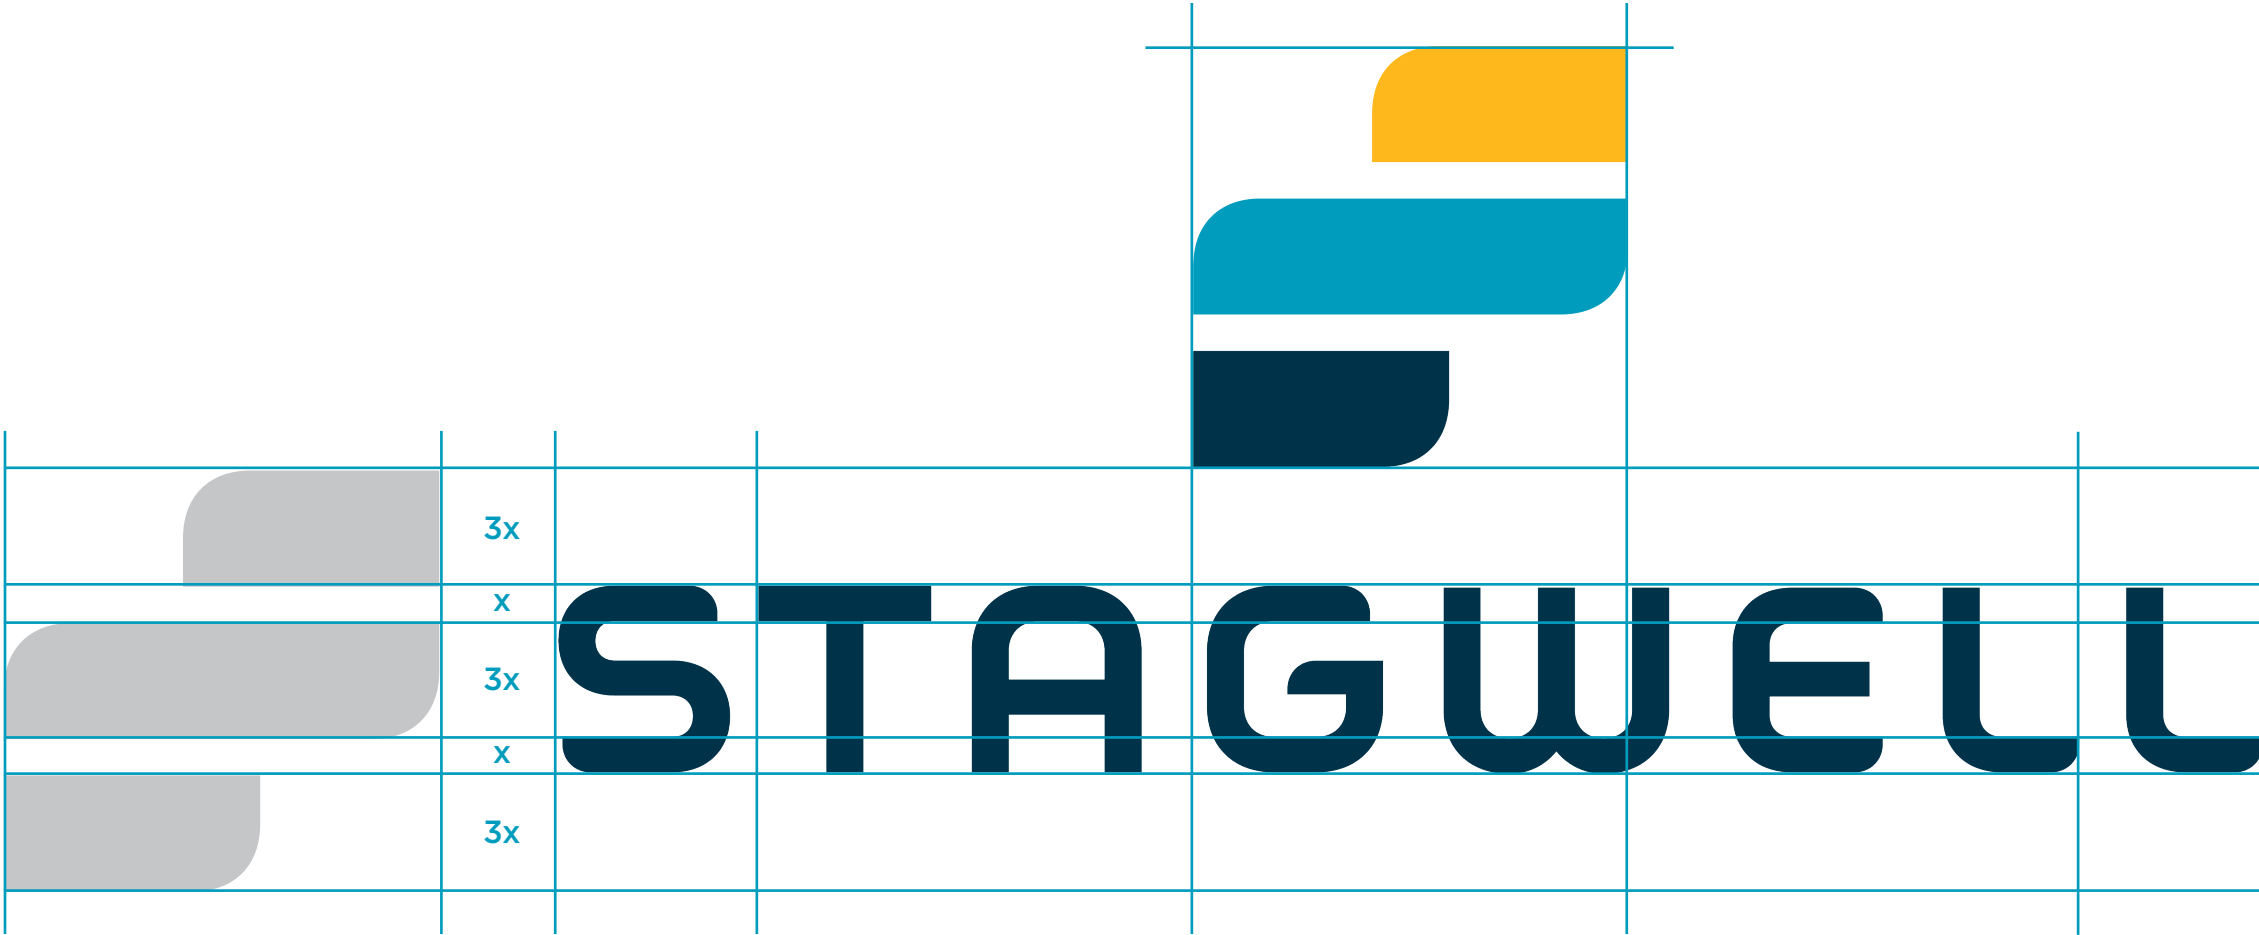

The vertical logo should be used when space is limited in order to be able to maximize the scale at which it is used.

2.1 SPACING

This graph represents the correct way to find the logo symbol size and space ratios.

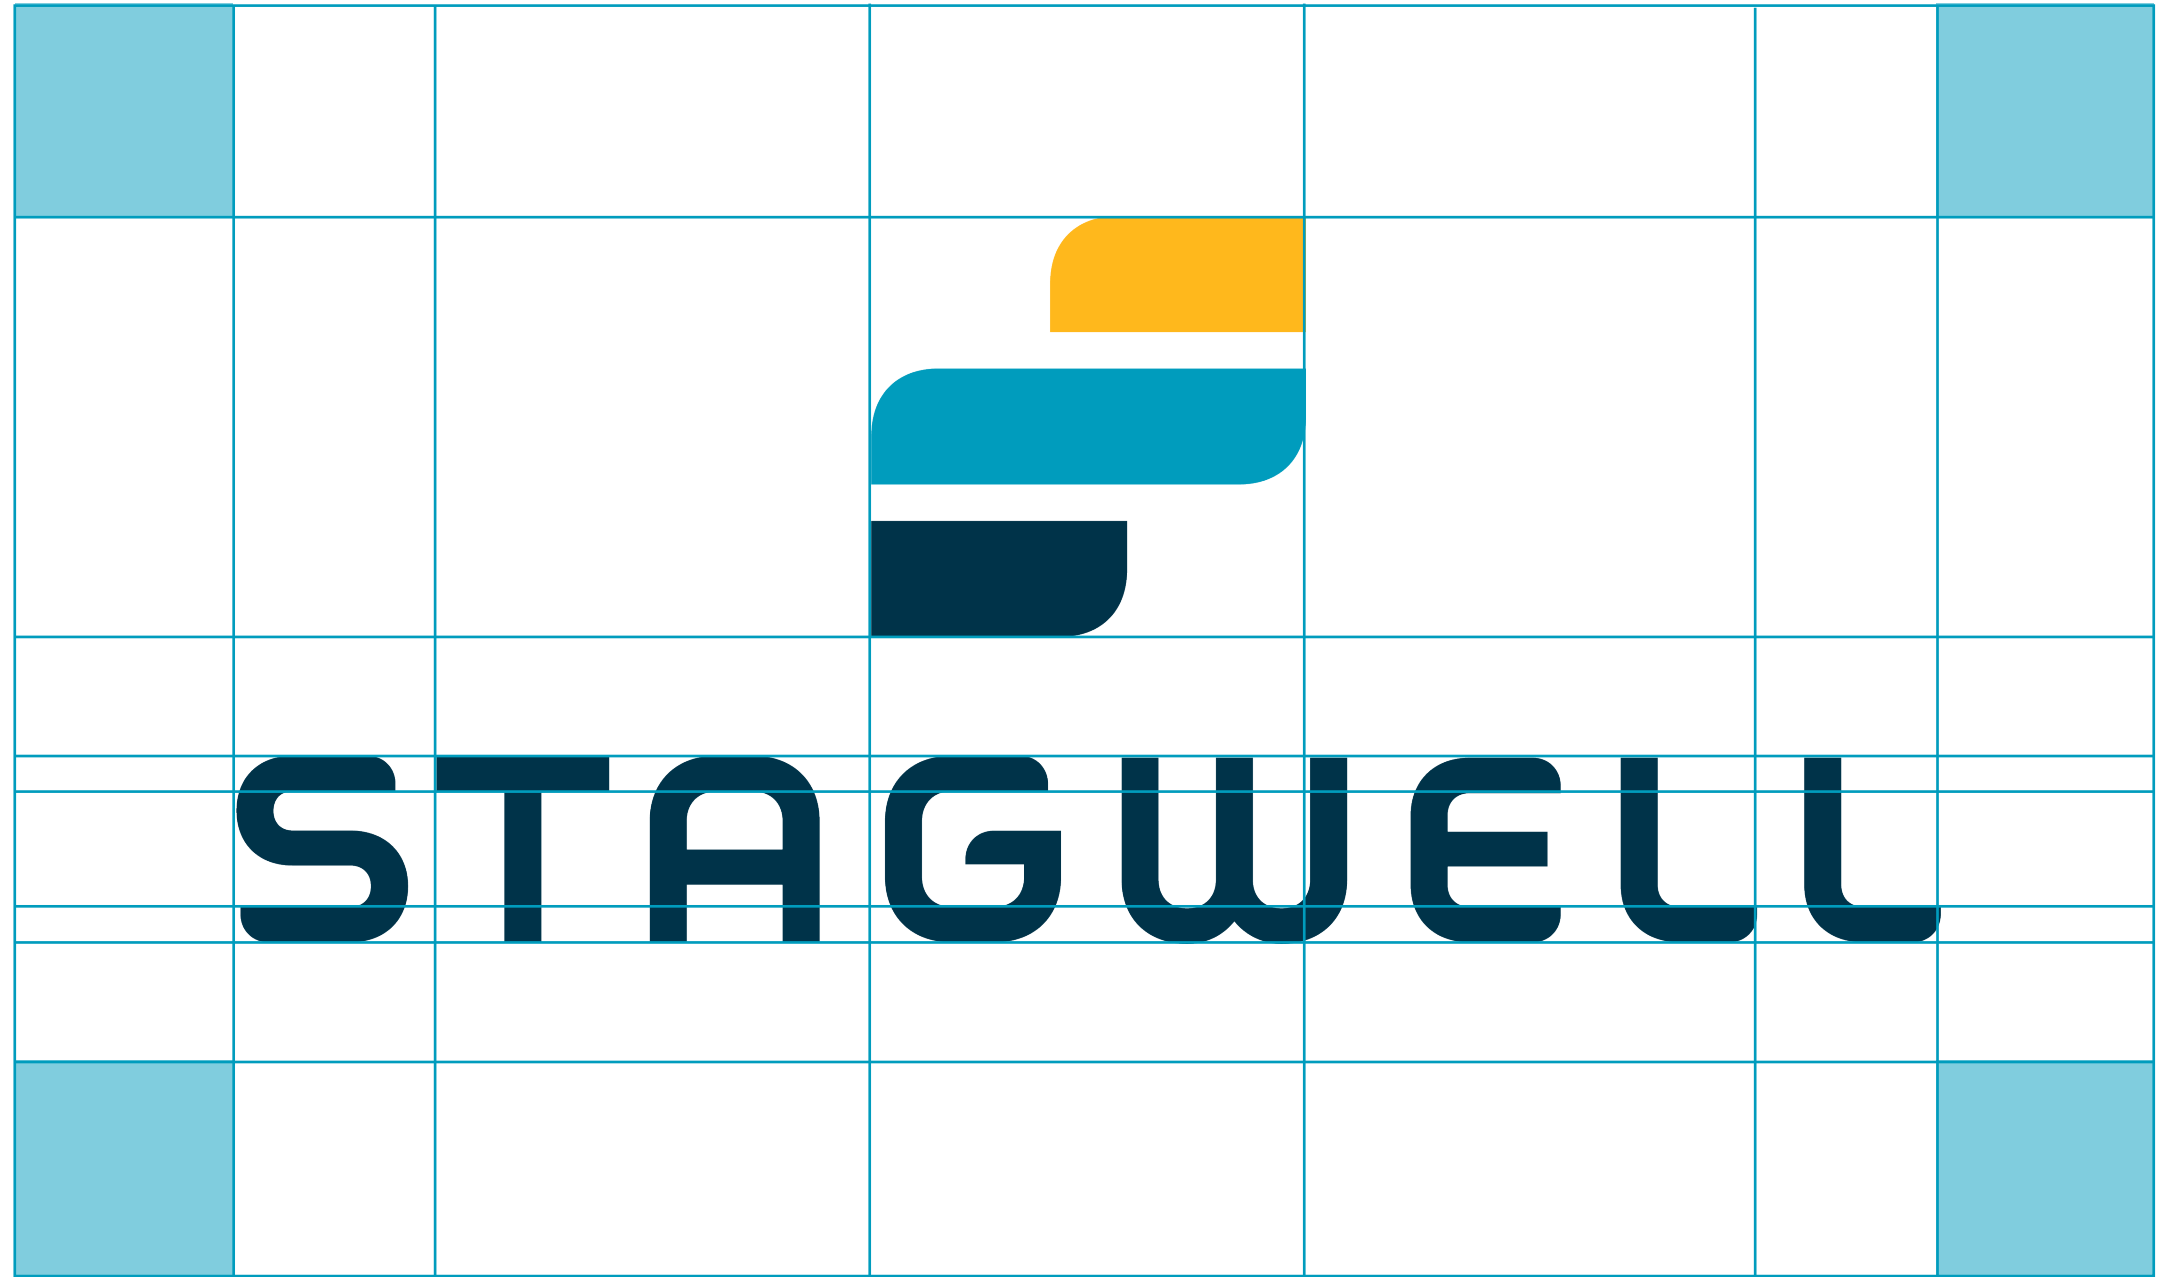

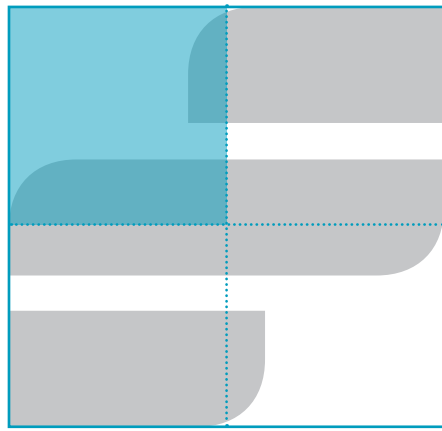

To find the right size proportion between the wordmark and the symbol, start with a horizontal lockup orientation. The relation between the cap height of the wordmark to the height of the symbol should be 5x : 11x. Once you find the correct size proportion using this method, move the symbol above the wordmark, center it and space it 3x away from the cap height.

2.2 CLEARANCE AREA

Maintaining a consistent area of isolation around the logo preserves maximum legibility and brand impact. These margins should surround the logo and separate it from headlines and text.

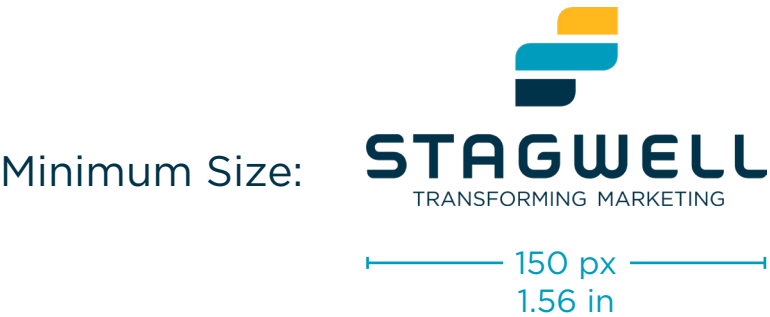

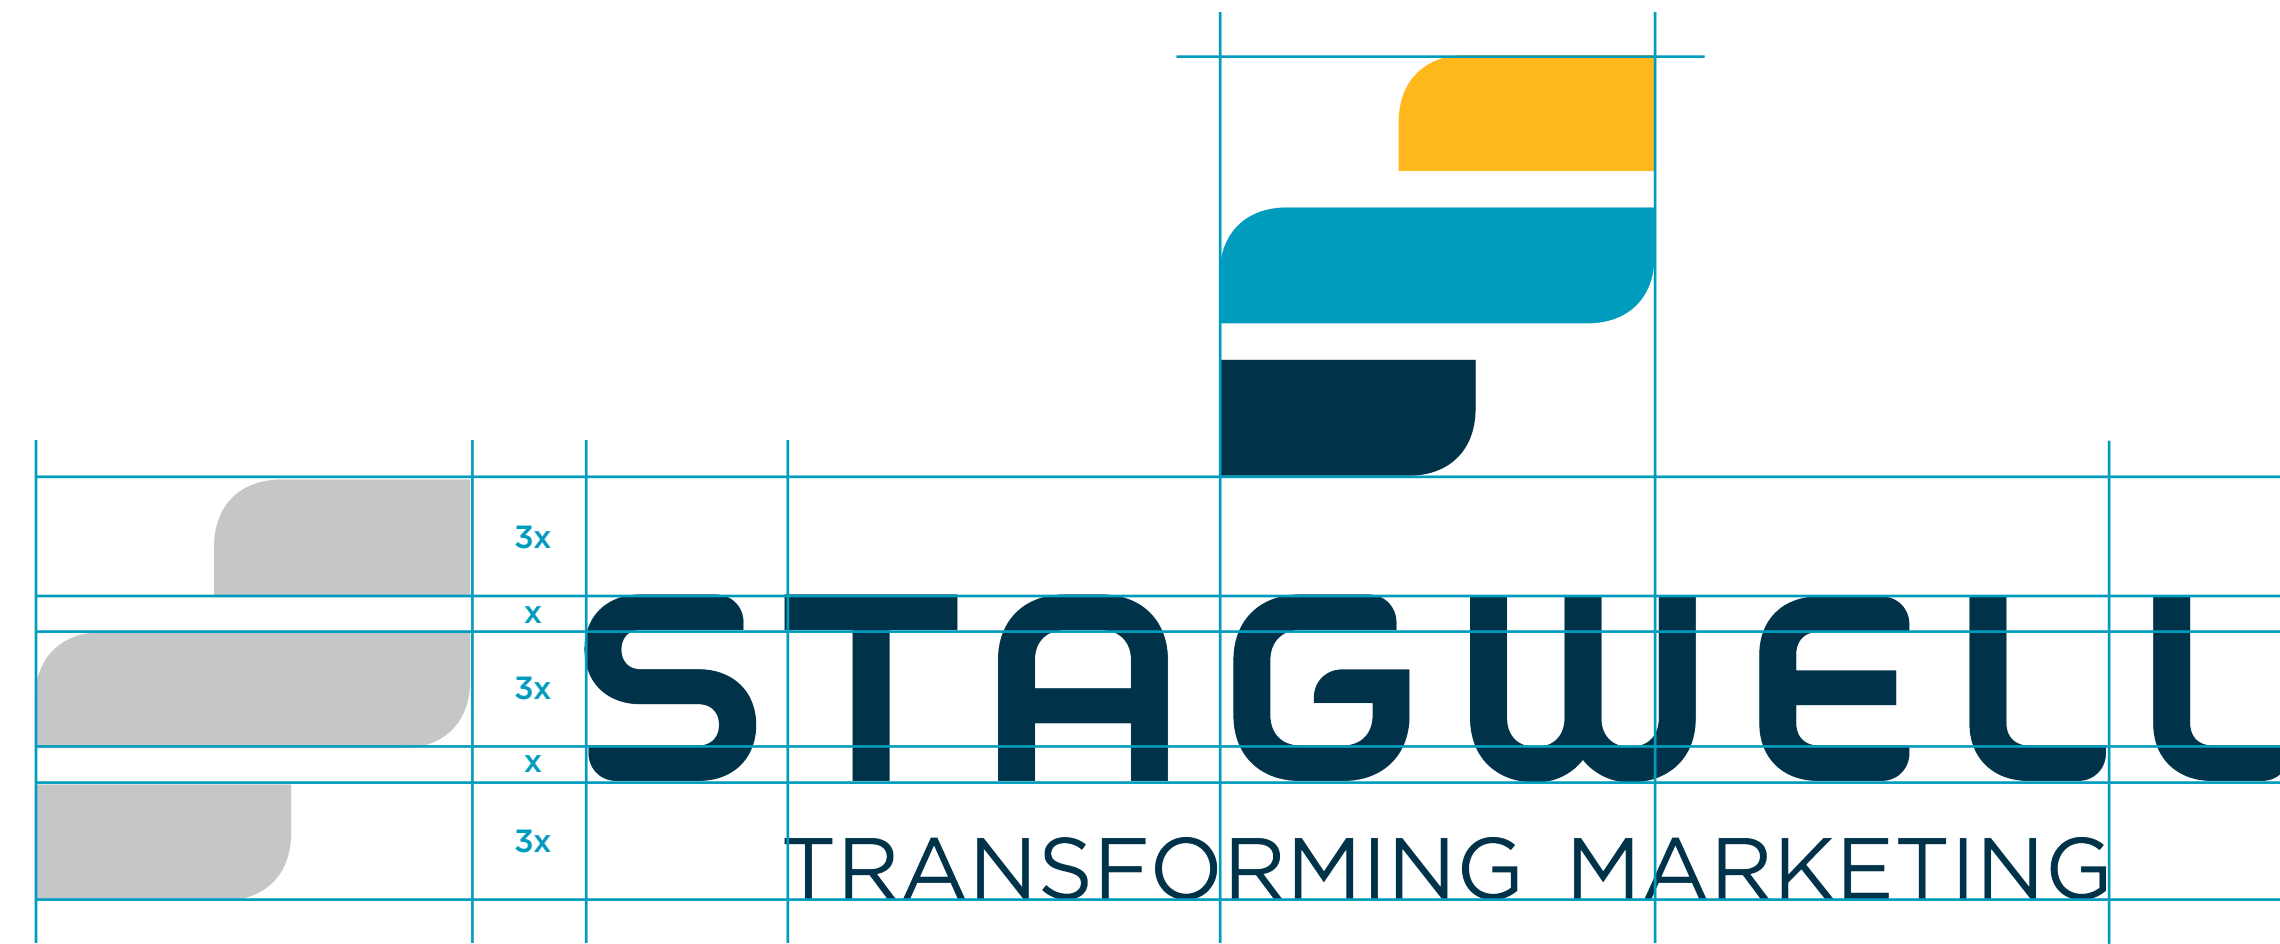

Whenever possible, allow for a minimum padding around the logo lockup based on half of the height of the logo symbol around all sides.

2.3 TAGLINE & MINIMUM SIZE

The tagline “Transforming Marketing” is set in Gotham Medium and should appear locked up with the logo whenever it is possible. Using the horizontal lockup as a reference, the tagline should be centered underneath the wordmark aligned to the bottom of the position of the symbol from the horizontal lockup. The tagline should spread to the width of the left side of the letter “T” and the right side of the first letter “L” from the word STAGWELL.

The full Stagwell logo lockup with tagline should not be used at sizes less than 150 px for optimal legibility. When it is necessary to use the logo at a size smaller than 150 px, use without the tagline.

IMPROPER LOGO USE

1. **Do not** rotate.
 2. **Do not** change the color.
 3. **Do not** frame the logo or put it inside of a shape to separate it from other elements.
 4. **Do not** typeset the logo with other fonts.
 5. **Do not** distort the logo.
 6. **Do not** place the full-color logo over busy or dark backgrounds.
 7. **Do not** add a drop shadow.
 8. **Do not** place anything on the logo or add new elements.
- * **These rules apply to both lockup orientations!**

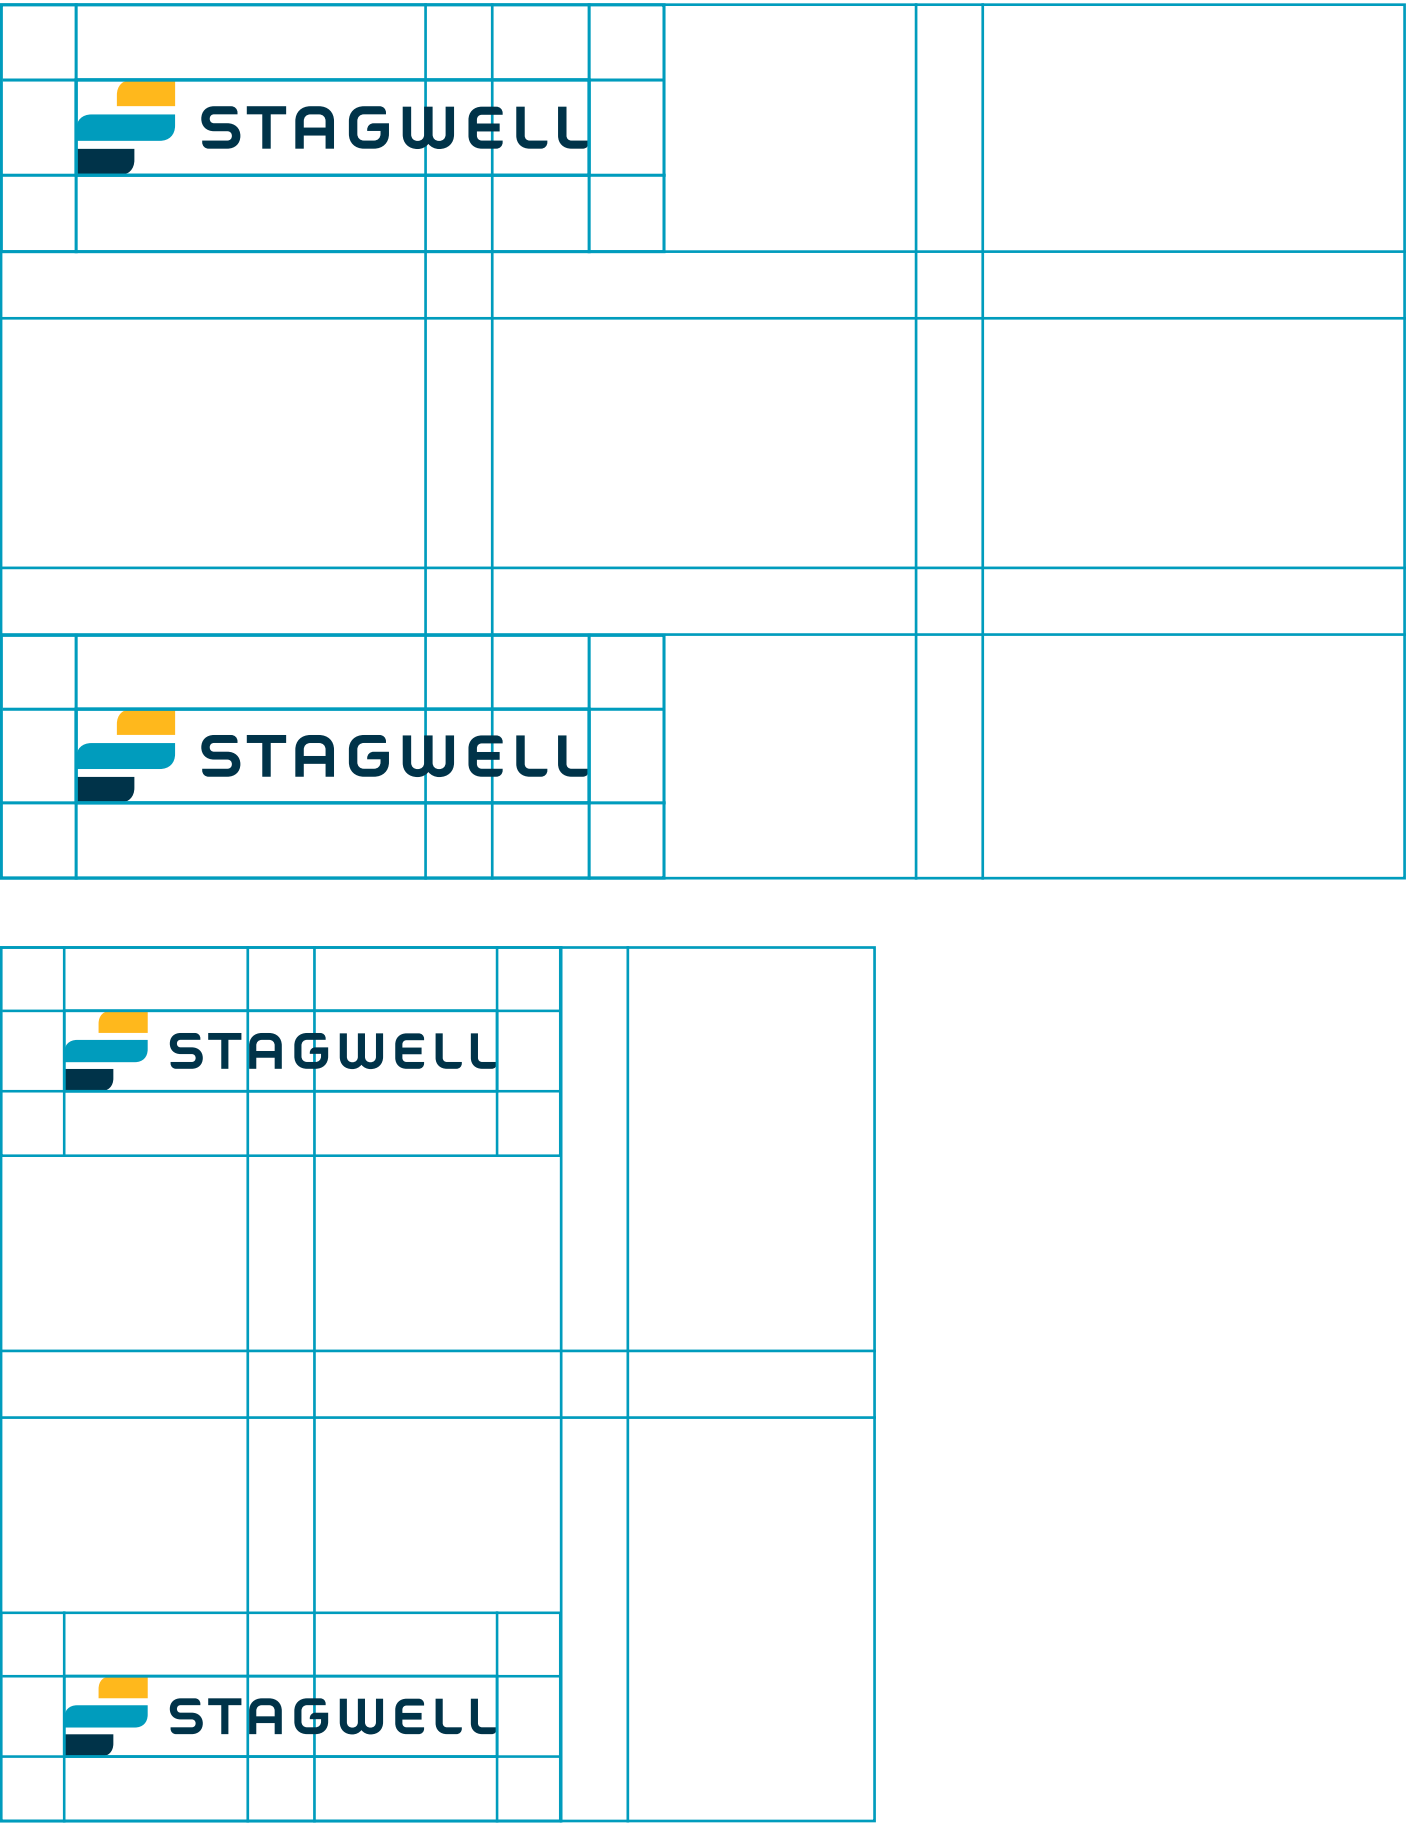

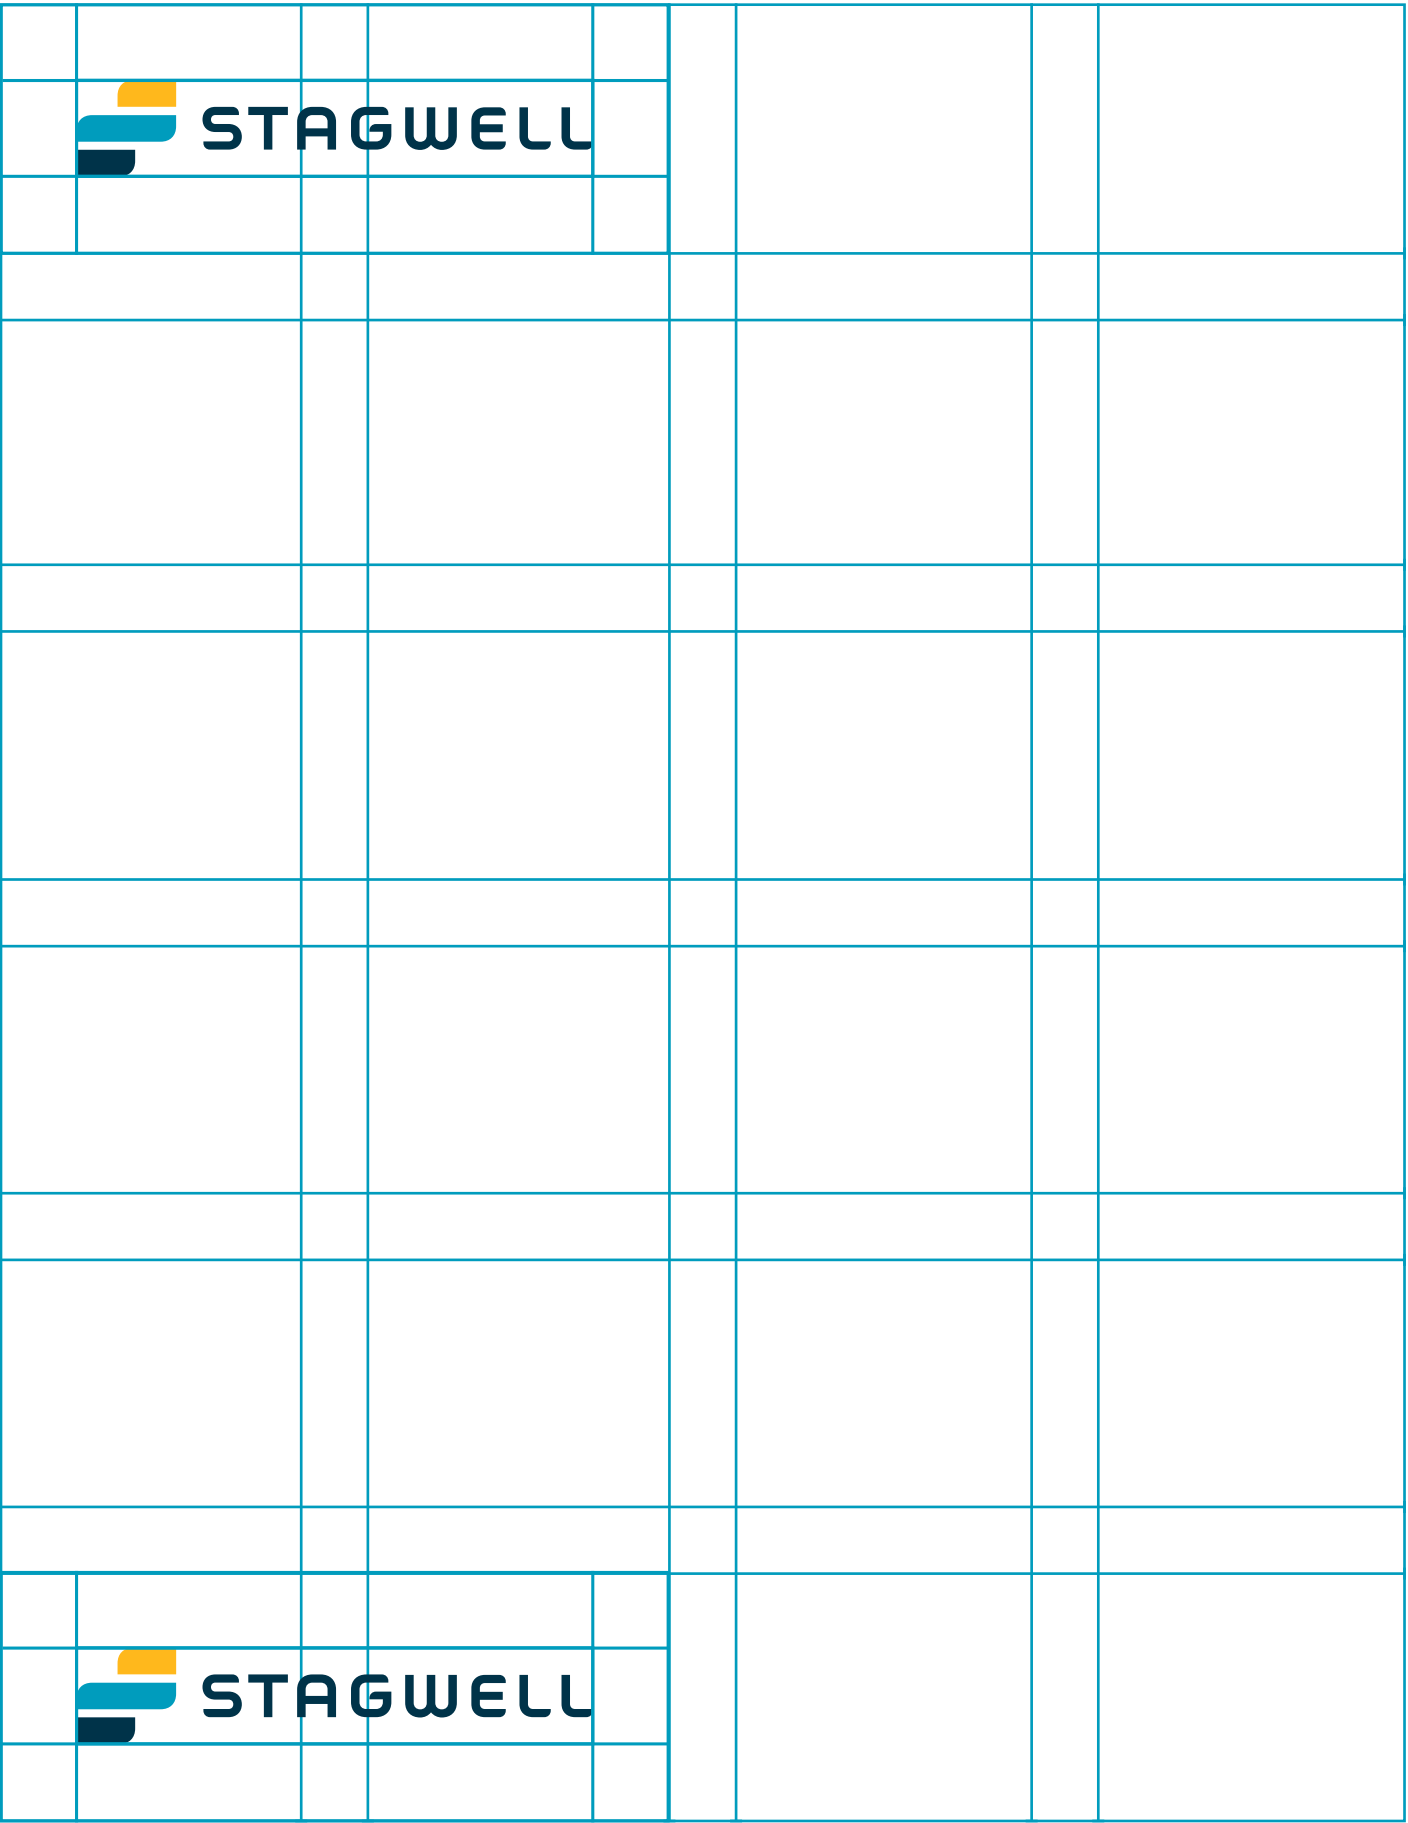

LOGO SIZE AND PLACEMENT

The Stagwell logo with or without the lockup can appear in layouts in three positions: top left or bottom left. Do not center the logo horizontally in a layout, unless that is the only possible placing.

In these examples grid systems were used to establish a proper relative size of the logo. This is a good rule to use when formatting a layout.

* **Various media could need different positions of the logo based on requirements and legibility.**

COLOR PALETTE

The consistent use and control of color is key to create a unified Stagwell brand impression. The color palette is intentionally limited to unify the brand globally.

The three primary colors are marigold, light blue and navy blue. The marigold color stands for the heritage of MDC Partners. The navy blue represents the heritage of Stagwell Group. Lastly, the light blue represents the union of the two.

The three primary colors are complemented by neutral white, gray and black values that have limited use for background, copy and size limitations for the logo.

Pantone 1235 C CMYK 0 25 94 0 RGB 255 184 28 HEX FFB81C	Pantone 7703 C CMYK 78 10 9 3 RGB 0 156 189 HEX 009CBD	Pantone 2189 C CMYK 100 39 3 74 RGB 0 51 73 HEX 003349
Pantone Bright White CMYK 3 1 2 0 RGB 245 247 246 HEX F5F7F6	Pantone Glacier Grey CMYK 11 0 22 RGB 197 198 199 HEX C5C6C7	Pantone 419 C CMYK 76 65 66 90 RGB 33 35 34 HEX 212322

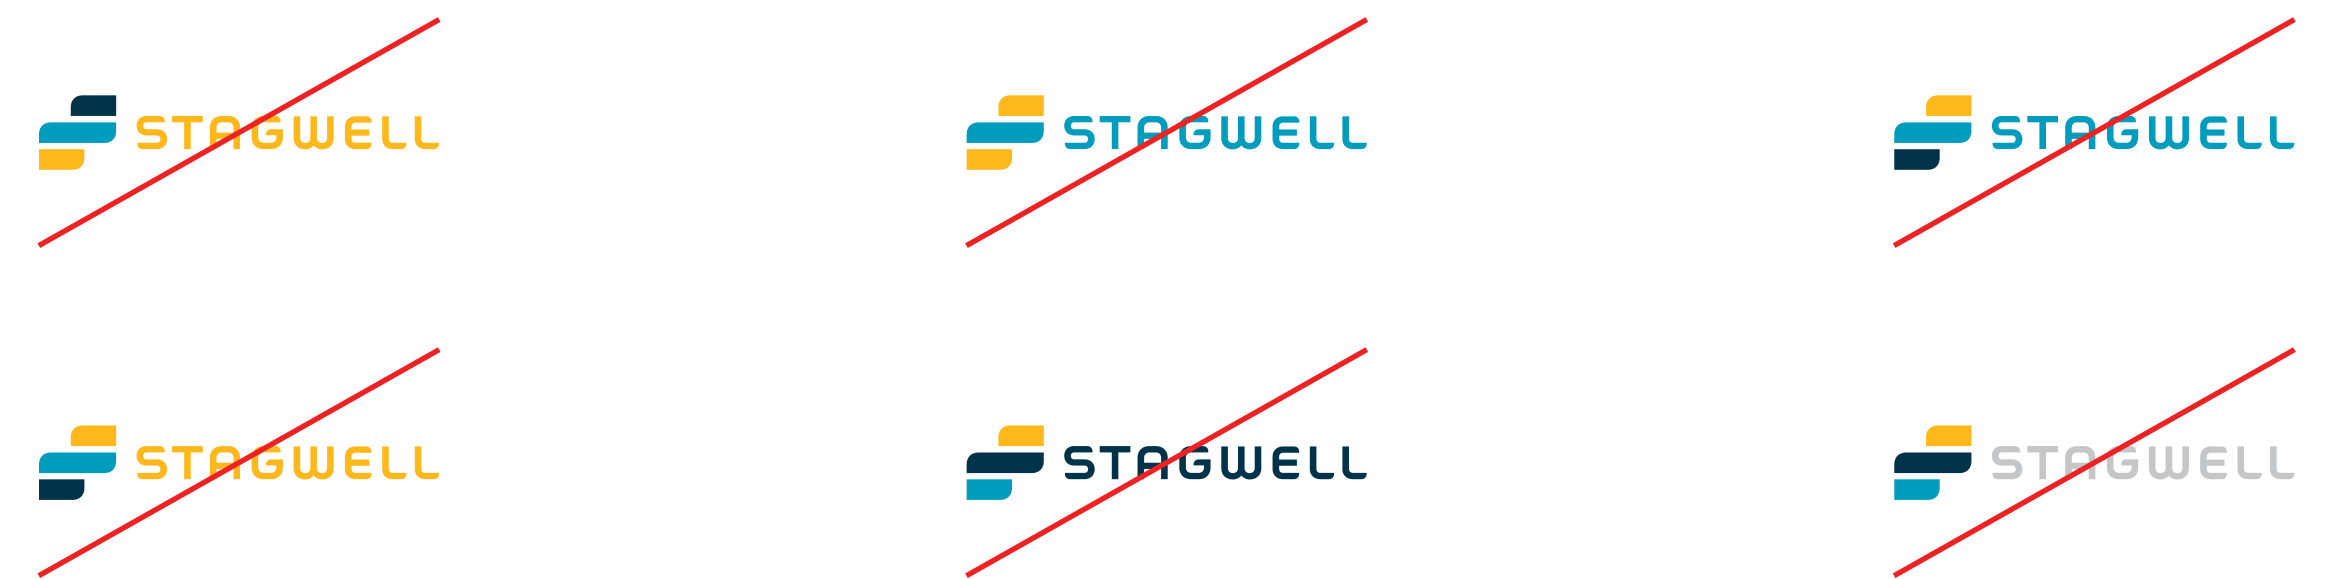

4.1. PREFERRED COLOR COMBO

This is the preferred color combination for the logo lockup. The marigold bar represents MDC Partners heritage and the navy blue bar represents the Stagwell Group heritage. The lighter blue bar in the center of the symbol represents the two coming together. This symbolism behind the color arrangement is key in the representation of the brand and should not be altered.

The following are general rules on logo color:

1. **Do not** rearrange the colors within the symbol.
2. **Do not** set the wordmark in any of the other two colors that are a part of the symbol.
3. **Do not** use any colors that are not a part of the brand palette for the logo lockup.

* **These rules apply to both lockup orientations!**

4.2 PREFERRED SINGLE COLOR

In limited cases the one-color brand mark may be used for legibility where the logo appears smaller than recommended. In some instances one color could be the most efficient way to eliminate complexity in screen printing, embroidery, small scale or when using limited colors. The one-color logo should not be utilized for typical marketing communications.

The following are general rules on single-color use for the logo:

1. **Do not** set in the lighter blue or marigold.
2. You **can** set in 100% black when color is not an option.
3. You **can** set in white over the navy blue or 100% black background when the logo has to be inverted.

* **These rules apply to both lockup orientations!**

5.1 MONTERRAT PRIMARY TYPEFACE

Montserrat represents a versatile, modern and legible font family that is web-friendly and accessible for a broader audience. This is Stagwell’s primary typeface and should be used across all media.

Different weights are available for headlines, subheads, quotes and body copy. The predominant usage of sentence case allows for ease of legibility and approachability.

Montserrat semi-bold—Headlines.
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
!@#\$%^&1234567890

Montserrat light—Subheads.
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
!@#\$%^&1234567890

Montserrat regular—Body copy.
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
!@#\$%^&1234567890

Headlines are in
Montserrat semi-bold,
ulc, 0 pts. of leading.
Optical kerning.

FOR SUB-HEADLINES, USE MONTERRAT LIGHT.
ALL CAPS, AUTO LEADING. OPTICAL KERNING.

Montserrat regular is for body copy. It allows for scaling and readability at small sizes. The leading is auto and there’s no added tracking. Set all type to optical kerning.

5.2 SPECTRAL ACCENT TYPEFACE

Spectral is an elegant angular serif font that complements the round geometric nature of Montserrat. Use Spectral as an accent to emphasize words in headlines. When pairing with Montserrat Semi-Bold for headlines, always make sure that both fonts are set to optical kerning, Spectral should be a few pts larger than Montserrat to balance x-height difference, and set to -10 tracking. Spectral should not be used in place of Montserrat for full headlines, subheads or body copy.

Special uses:

- 1. Use as an accent to emphasize words in headlines.
- 2. Use in headers/footers of presentations to identify categories.

Spectral Semi-Bold
ABCDEFGHIJKLM
NOPQRSTUVWXYZ
abcdefghijkl
opqrstuvwxyz
!@#\$%^&1234567890

40 pt size
45 pt leading
Optical kerning
0 pt tracking

Montserrat Semi-Bold goes
with Spectral semi-bold.

45 pt size
45 pt leading
Optical kerning
-10 pt tracking

5.3. FONT PAIRING APPLICATION

Stagwell's formula of success "creative + connected = effective" serves as a good example of how Montserrat and Spectral can be paired effectively to add emphasis and convey more complex ideas. Montserrat represents the practical and technological aspect; whereas Spectral represents creativity.

This is secondary messaging that can be used in layouts, signage, presentations to add another brand element.

Creative +
Connected
= *Effective*

Creative + Connected = *Effective*

Brand Assets

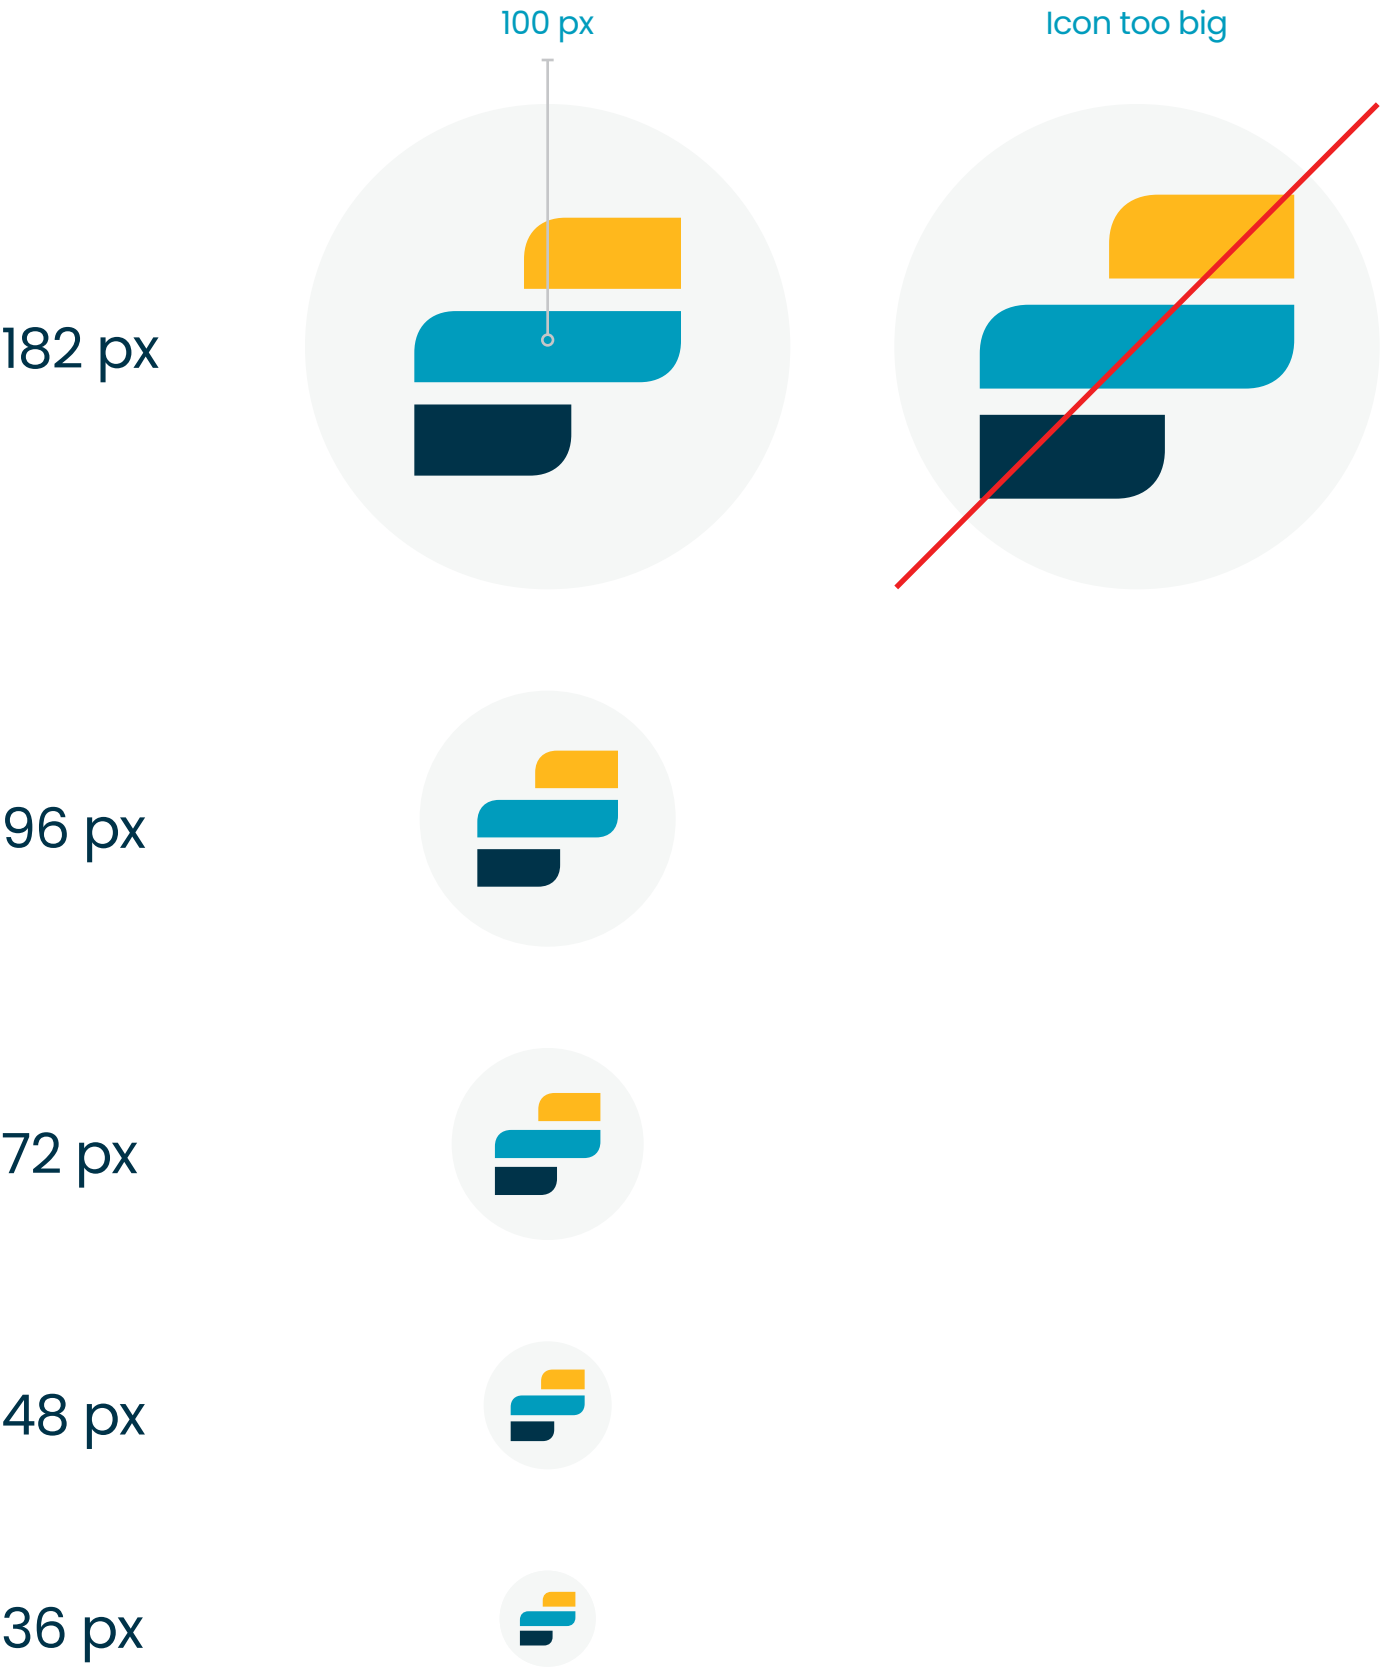

Social Media

- 1.1 Circular Social Media Icons
- 1.2 Square Social Media Icons

1.1 CIRCULAR SOCIAL MEDIA ICONS

Use the logomark without the wordmark over the white color part of Stagwell’s color palette. On social media, the name handle is always in immediate proximity to the profile icon; therefore, repeating the wordmark in the profile icon becomes redundant.

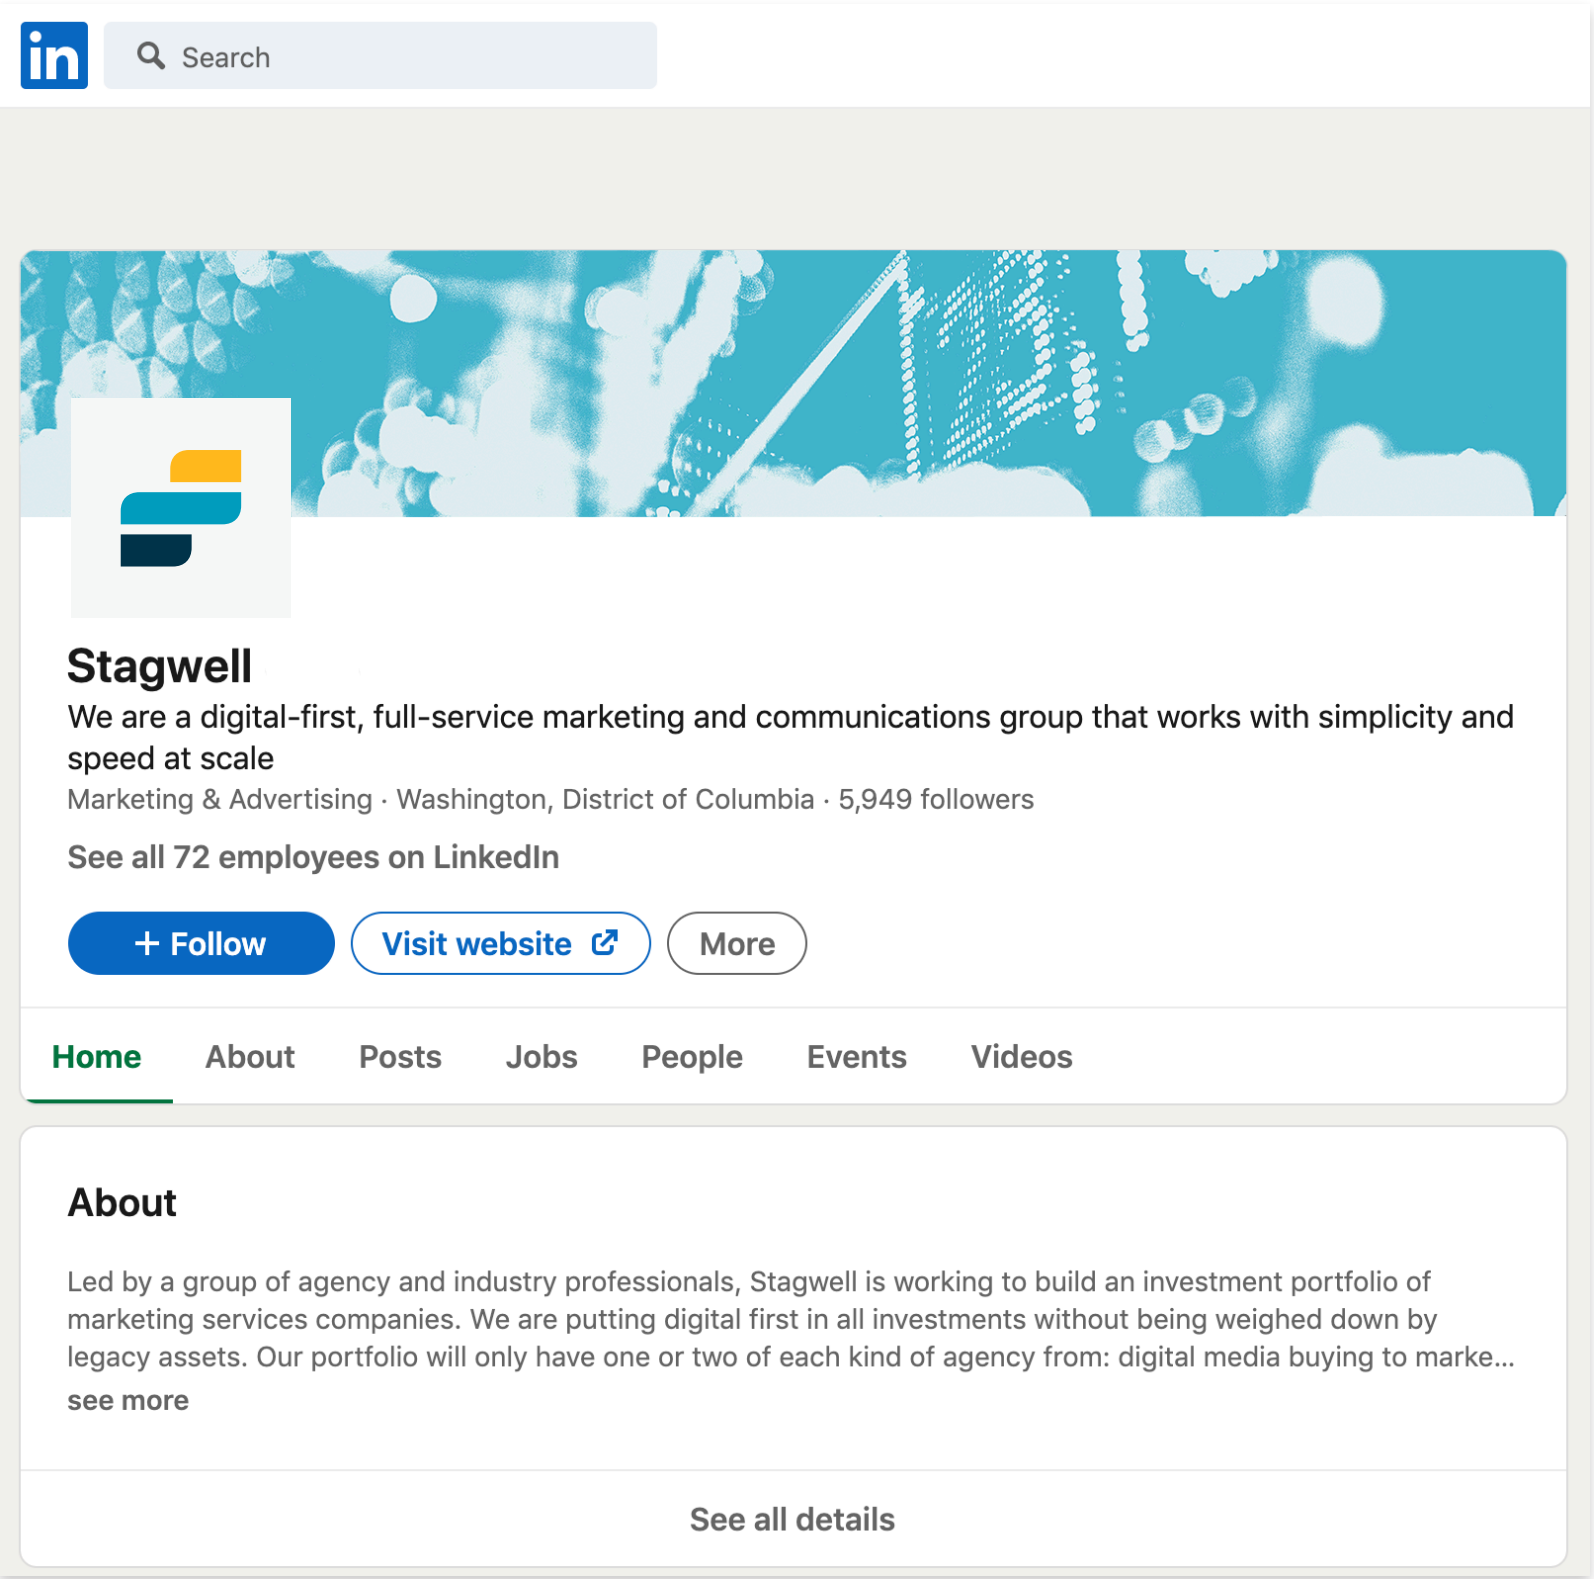

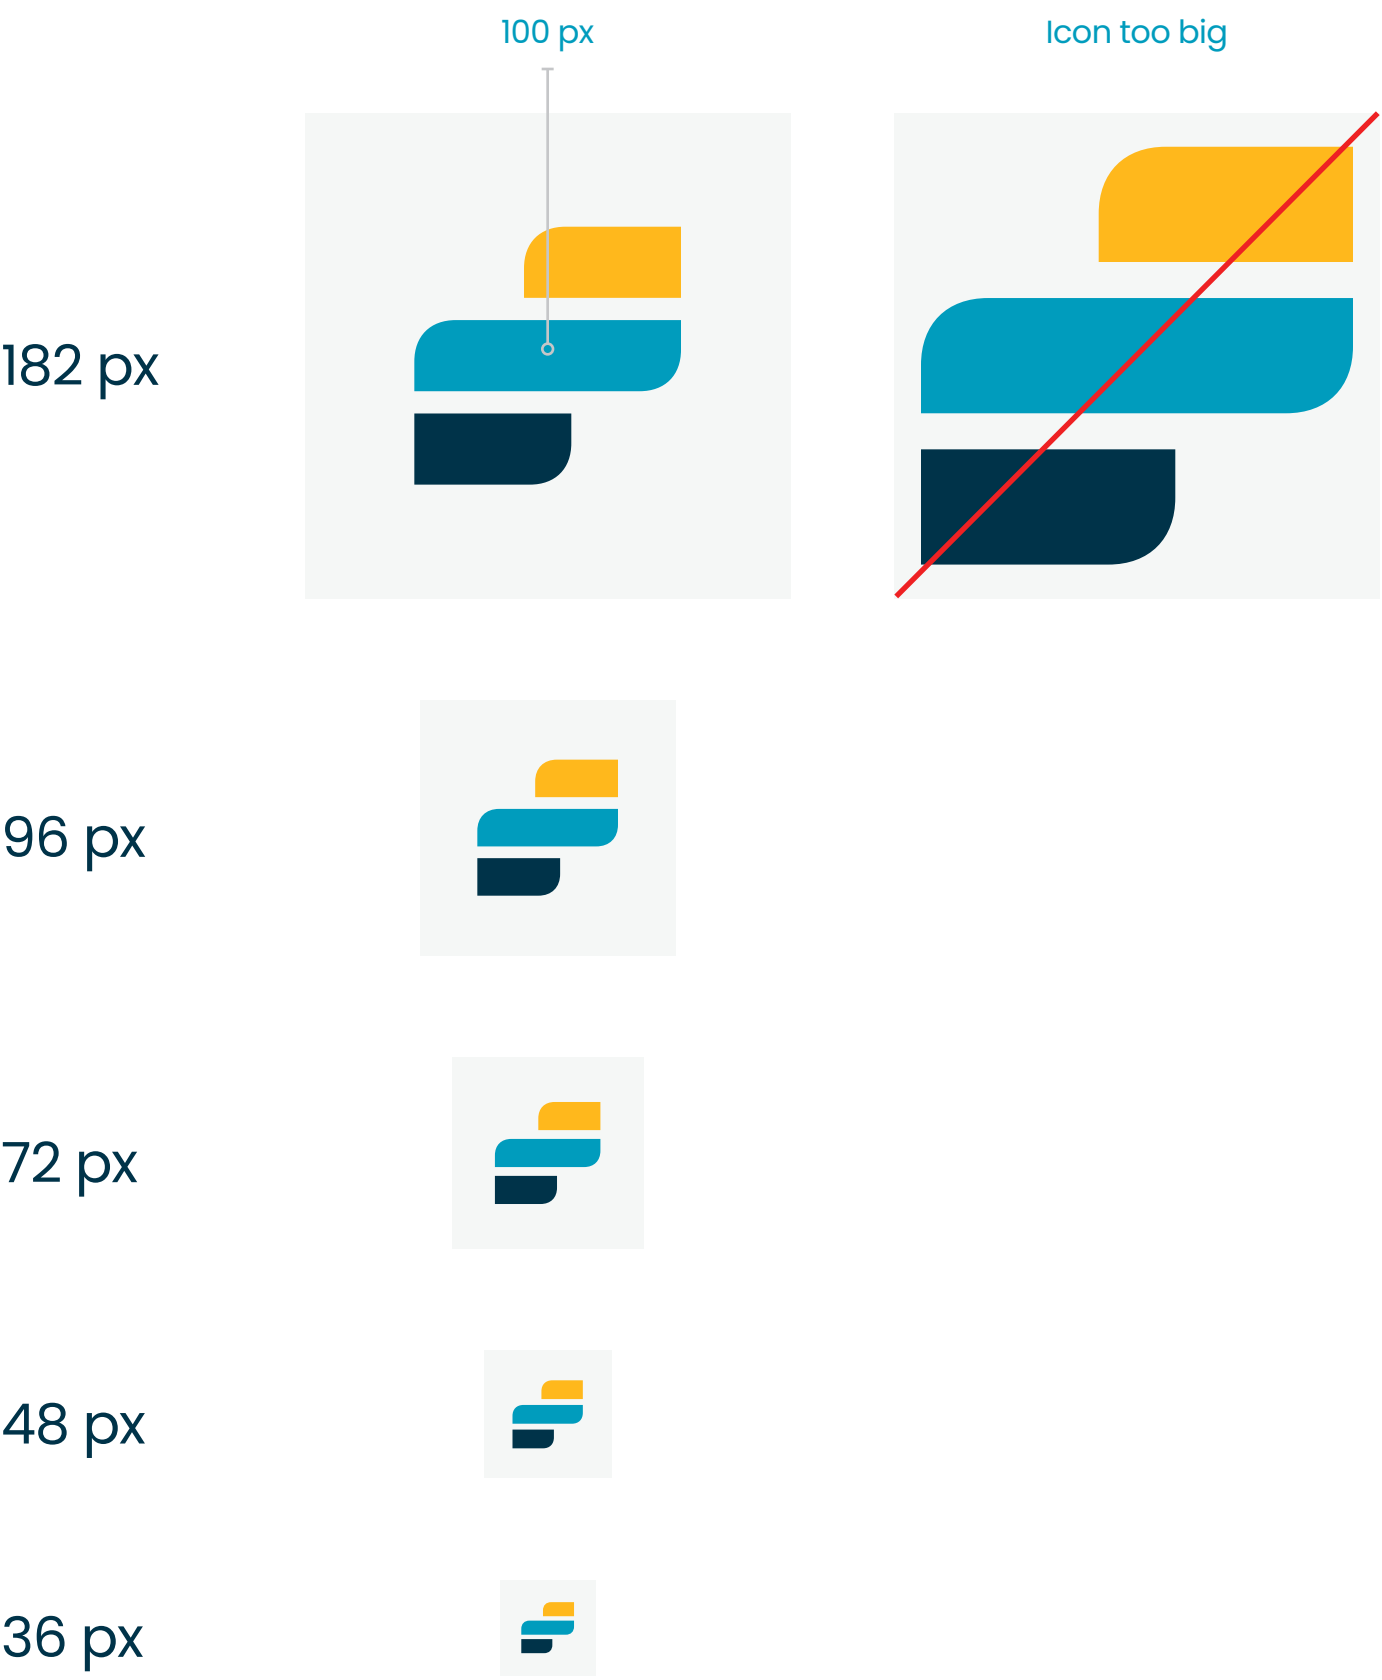

The usage minimum size of the icon is 36 pixels. The icon should be placed in the center with an area of isolation for balance.

1.2 SQUARE SOCIAL MEDIA ICONS

Use the logomark without the wordmark over the white color part of Stagwell’s color palette. On social media, the name handle is always in immediate proximity to the profile icon; therefore, repeating the wordmark in the profile icon becomes redundant.

The usage minimum size of the icon is 36 pixels. The icon should be placed in the center with an area of isolation for balance.
